THE AGROMECK

PVBLISHED ANNVALLY
BY THE MEMBERS OF
THE SENIOR CLASS

OF THE

N.C.A.&M.
COLLEGE

WEST RALEIGH, N.C.

This Annual was Designed, Monotyped, Printed
Bound and Made Complete in the Establishment
of the Edwards and Broughton Printing Company
Raleigh, North Carolina

Foreword

A college is a vast laboratory. For the past four years we have each been conducting his own experiments. This book is a summary of our data sheets. With youth's characteristic undervaluation we do not appreciate the beneficent influence derived from these various experiments. But, some day in the struggle toward the solution of the great complex—Life—we shall learn to realize, appreciate, and enjoy. Then memory shall be dear. If this, the 1915 Agromeck, serves to keep forever keenly alive the fond memories of our undergraduate days, it will have accomplished its purpose successfully

To

Joshua Plummer Pillsbury

Professor of Horticulture

This thirteenth volume of The Agromeck is gratefully dedicated
as a token of appreciation for his thoughtful and
courteous treatment of the Class
and, moreover, for his untiring efforts
to beautify our campus

Joshua Plummer Pillsbury

Somewhat less than four years ago Joshua Plummer Pillsbury was called to the professorship of horticulture in this institution. A college generation is not long, but it is long enough for students and teachers to learn to know each other well. It is significant that this volume of the AGROMECK, the memoirs of their college days, should be dedicated to Professor Pillsbury by members of the class that came into being when he entered upon his work in North Carolina. It is a fitting tribute of appreciation to the worth and usefulness of the man.

Professor Pillsbury is one of six children born to Joshua Plummer Pillsbury, senior, and Harriet M. Ross Pillsbury. His father, a Methodist minister, served various charges in Ohio, and was stationed for several years at Newark, a town of some size with a good high school. Here young Pillsbury received his preparatory training. In 1891 he went to St. Louis to begin his professional course at the Missouri Botanical Garden, one of the best places in the country to study plants. At that time the staff included among others Dr. William Trelease, director, Dr. J. C. Whitten, horticulturist, and Dr. H. J. Webber, botanist, each of whom has attained a national reputation in his special field of work. Under such men as these a broad and thorough foundation for his chosen profession was laid during the four years of the course at the Garden. In 1895 Mr. Pillsbury received his certificate of graduation, and as head gardener assumed management of the greenhouses and horticultural plantings of the Pennsylvania State College. Three years later he became assistant in horticulture, which position he filled for twelve years. During this period he was associated with Professor George C. Butz, one of the foremost horticulturists in the eastern states, and, after his death in 1907, with his successor, Professor R. L. Watts, who is now dean of the School of Agriculture of that institution. A number of bulletins of the Pennsylvania Agricultural Experiment Station embody the work of this period. In spite of exacting and time-consuming duties, Mr. Pillsbury found time to round out his studies by taking work in other departments of the School of Agriculture, receiving the degree of Bachelor of Science in Agriculture. In the same year, 1910, he was made

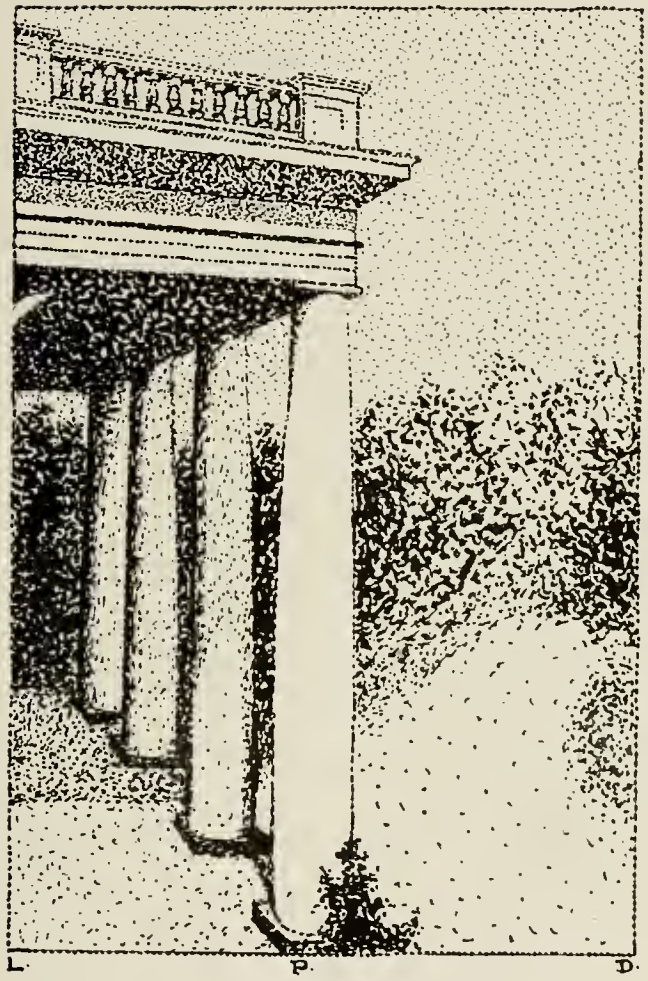

assistant professor of horticulture and was put in charge of a new four-year professional course in landscape gardening which he had designed and organized during the preceding year.

In 1895 Mr. Pillsbury married Miss Charlotte Dunford, daughter of Mr. J. W. Dunford, an English gardener, who still has charge of the vegetable division at the Missouri Botanical Garden. Their two attractive children are Ross and Dorothy.

In 1911 Professor Pillsbury succeeded Professor F. C. Reimer as professor of horticulture in the North Carolina College of Agriculture and Mechanic Arts and horticulturist in the Agricultural Experiment Station. He has brought to his work here, in the prime of his life, the broad knowledge, sympathetic understanding, ripe experience and rare good judgment developed in the fields of his previous work. H. R. F.

The North Carolina College of Agriculture and Mechanic Arts

During the years in which North Carolina was slowly emerging from the economic havoc wrought by Civil War and Reconstruction, some far-sighted men began to see the necessity of rearing industrially equipped men. They felt keenly the need of competent men to build and direct new industries, and to restore the land which had been impoverished by slave labor. They recognized that men capable of doing what was needed would have to be educated in industrial schools and technical colleges. This recognition came slowly, because the Southern people up to that period had been wedded to classical education.

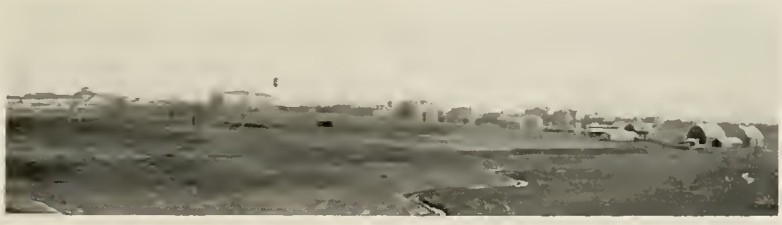

The first organized body to take steps for the establishment of an industrial institution in North Carolina was the Watauga Club. This club, composed of bright young men, explained its mission by declaring that it was "an association in the City of Raleigh, designed to find out and make known information on practical subjects that will be of public use." In 1885 this club presented to the Legislature the following memorial:

> We respectfully memorialize your honorable body:
>
> First. To establish an industrial school in North Carolina which shall be a training place for young men who wish to acquire skill in the wealth-producing arts and sciences.
>
> Second. To establish this school in Raleigh in connection with the State Agricultural Department.
>
> Third. To make provision for the erection of suitable buildings and for their equipment and maintenance.
>
> (Signed) Arthur Winslow, *Chairman.*
> W. J. Peele.
> Walter H. Page.

This memorial quickened general interest in the proposed school, and several bills looking to its foundation were introduced in the Legislature of 1885. On March 7 one of these bills, introduced by Hon. Augustus Leazar, of Iredell County, became a law. This law provided that the Board of Agriculture should seek proposals from the cities and towns of the State, and that the school should be placed in the town offering most inducements. The Board of Agriculture finally accepted an offer from the City of Raleigh.

Meantime, the ideas of the advocates of the school had been somewhat broadened as to the character of the proposed institution. They saw that Congress was about to supplement the original Land Grant Act by an additional appropriation for agricultural and mechanical colleges in each State. The originators of the conception then sought the aid of progressive farmers in order to change the school into an Agricultural and Mechanical College. Col. L. L. Polk, the editor of the newly established *Progressive Farmer*, threw the weight of his paper heartily into the new idea. Meetings were held in various places, and two very large meetings in Raleigh considered the proposition. As a result the school already provided for was, by action of the Legislature of 1887, changed into an Agricultural and Mechanical College, and the Land Scrip Fund was given the newly formed institution. In addition, the law directed that any surplus from the Department of Agriculture should go into the treasury of the college. Mr. R. Stanhope Pullen, one of Raleigh's most broad-minded citizens, gave the institution eighty-three acres of land in a beautiful suburb of Raleigh. The first building was completed in 1889, and the doors of the college were opened for students on October the third, 1889. Seventy-two students, representing thirty-seven counties, were enrolled the first year. The faculty consisted of six full professors and two assistants.

From this small beginning in 1889 the college has grown to be the second in size in students and faculty among the colleges for men in the State. It has now a faculty of sixty members; a student enrollment in all courses of 760; and twenty brick buildings.

Faculty

Daniel Harvey Hill, A.M., LL.D.

President

A.B., Davidson College, '80-'86; Lit.D., '05; LL.D., University of North Carolina, '10; Professor of English, Georgia Military and Agricultural College, '80-'89; Professor of English, N. C. A & M, '89-'08; Vice-President, '05-'08; President, '08—

Wallace Carl Riddick, A.B., C.E.

Professor of Civil Engineering, and Vice-President

A.B., University of North Carolina, '85; C.E., Lehigh, '90; Engineer, Roanoke (Virginia) Water and Power Company, '90-'92; Professor of Mathematics and Civil Engineering, N. C. A & M, '92-'95; Professor of Civil Engineering, '05—; Vice-President, '08—

William Alphonso Withers, A.M.

Professor of Chemistry

A.B., Davidson College, '83; Postgraduate Student, Cornell, '88-'90; Fellow, '89-'90; Elected to Sigma Xi; Assistant Chemist, N. C. Experiment Station, '84-'88; Chemist, '97; Acting Director, '97-'98; State Chemist, North Carolina, '97-'98; Professor of Chemistry, N. C. A & M, '89—; Member Executive Committee, Pure Food and Drug Congress, '98; Vice-President American Chemical Society, '01-'02; Fellow, American Association for the Advancement of Science; President, American Association of Official Agricultural Chemists, '09-'10; Author, N. C. Pure Food Law, '99.

Robert E. Lee Yates, A.M.

Professor of Mathematics

A.M., Wake Forest College, '88; Adjunct-Professor of Mathematics, N. C. A & M, '91-'05; Student in Higher Mathematics, Chicago University, '05-'06; Professor of Pure Mathematics, N. C. A & M, '06—

THOMAS NELSON

Professor of Textile Industry

Diploma Cotton Manufacturing, Harris Institute, Textile School of Preston, Lancashire, England, '10; Special Designing and Cloth Analysis Course, Lowell Textile School, '98; Certificate Weaving and Designing, City and Guild of London Institute; Private Pupil in Designing and Mill Management of Mr. John Fish; Manager of Queens Mill, Preston, England; Experience in English, Northern, and Southern Mills; Member of American Textile Association; Author of Technical Books and *Textile Journal* Correspondent; Instructor in Warp Preparation and Power Loom Weaving, Lowell Textile School, Lowell, Mass., '00; Instructor in Weaving and Designing, N. C. A & M, '01-'06; Professor of Textile Industry, '06—

CLIFFORD LEWIS NEWMAN, M.S.

Professor of Agriculture

B.S., A & M of Alabama, '86; M.S., '87; Assistant Professor of Agriculture, University of Tennessee, '87-'89; Principal of Athens (Alabama) Agricultural School, '89-'91; Assistant Agriculturist, Arkansas Experiment Station, '91-'97; Professor of Agriculture, University of Arkansas, '97-'05; Professor of Agronomy, Clemson College, S. C., '05-'08; Professor of Agriculture, N. C. A & M, '08—

WILLIAM HAND BROWNE, JR., A.B.

Professor of Physics and Electrical Engineering

A.B., Johns Hopkins, '90; Practical Engineer, '90-'96; Instructor of Electrical Engineering, University of Nebraska, '96-'98; Assistant Professor of Electrical Engineering, University of Illinois, '98-'02; Technical Editor, *Electrical Review*, '02-'08; Professor of Physics and Electrical Engineering, N. C. A & M, '08—

HOWARD ERNEST SATTERFIELD, M.E.

Professor of Mechanical Engineering

B.S. in M.E., Purdue University, '04; M.E., '09; Draftsman and Designer, '04-'05; Experimental Engineer, American Window Glass Co., Pittsburg, '05-'06; Superintendent of the Preble Plant of the Standard Sanitary Manufacturing Co., Pittsburg, '06-'07; Director of School of Applied Science, Winona Technical Institute, Indianapolis, '07-'08; Professor of Mechanical Engineering, N. C. A & M, '08—; Member of American Society of Mechanical Engineers.

THOMAS PERRIN HARRISON, PH.D.

Professor of English, and Dean of College

B.S., South Carolina Military Academy, '86; Instructor South Carolina Military Academy, '86-'88; Ph.D., Johns Hopkins University, '91; Associate Professor of English, Clemson College, S. C., '91-'96; Professor of English, Davidson College, N. C., '96-'08; Professor of English, N. C. A & M, '08—; Dean, '10—

GUY ALEXANDER ROBERTS, B.S., D.V.S.

Professor of Veterinary Science and Physiology

B.Agr., University of Missouri, '99; D.V.S., Kansas City Veterinary College, '03; Assistant North Carolina Veterinarian, '03-'07; Instructor of Veterinary Science and Physiology, N. C. A & M, '03-'05; Assistant Professor, '05-'06; Associate Professor, '06-'08, Professor, '08—

John Chester McNutt, B.S.Agr.
Professor of Animal Husbandry and Dairying

B.S.Agr., Ohio State University, '07; Superintendent, Hartman Stock Farm, Columbus, Ohio, '07-'08; Assistant in Animal Husbandry, New Hampshire State College, '08-'09; Assistant Professor, '09-'10; Associate Professor, '10; Professor of Animal Husbandry and Dairying, N. C. A & M, '10—

Joshua Plummer Pillsbury, B.S.
Professor of Horticulture

Certificate, Missouri Botanical Garden and Shaw School of Botany, Washington University, St. Louis, Mo., '95; Head Gardener, Pennsylvania State College, '95-'98; Assistant in Horticulture, '98-'00; B.S., Pennsylvania State College, '10; Designed and established the four-year course in Landscape Gardening at Pennsylvania State College, '10; Assistant Professor of Horticulture (in charge of Landscape Gardening) Pennsylvania State College, '10-'11; Professor of Horticulture, N. C. A & M, '11—

Harry Rascoe Fulton, M.A.
Professor of Botany and Vegetable Pathology

A.B., University of Mississippi, '00; A.M., University of Missouri, '05; A.M., Harvard University, '06; Instructor in Biology, University of Mississippi, '03-'04; Plant Pathologist, Louisiana Experiment Stations, '06-'08; Assistant and Associate Professor of Botany, Pennsylvania State College, '08-'12; Professor of Botany and Vegetable Pathology, N. C. A & M, '12—; Fellow, American Association for the Advancement of Science; Member of the American Physiopathological Society; Sigma Xi Scientific Society; Phi Kappa Phi Honor Society.

Melvin Ernest Sherwin, B.S.A., M.S.
Professor of Soils

B.S.A., University of Missouri, '08; M.S., University of California, '09; Student Assistant in Agronomy in charge of Detail Experiment Investigations, '06-'08; Assistant in Agronomy, University of California, '08-'09; Professor of Agronomy, University of Maine, '09-'10; Associate Professor of Soils, N. C. A & M, '10-'12; Professor of Soils, '12—

Carroll Lamb Mann, B.S., C.E.
Professor of Railroad Engineering

B.S., N. C. A & M, '99; C. E., '06; Isthmian Canal Commission, Nicarauga, '99-'01; Civil Engineer, Seaboard Air Line Railway, '01-'02; Instructor in Civil Engineering, N. C. A & M, '02-'08; Assistant Professor, '08-'13; Professor of Railroad Engineering, '13—

Zeno Payne Metcalf, B.A.
Professor of Zoology and Entomology

B.A., Ohio State University, Assistant in Zoology and Entomology, Ohio State University, '06; Instructor in Biology, Bloomington (Illinois) High School, '07; Instructor in Entomology, Michigan Agricultural College, and Assistant Entomologist, Michigan Experiment Station, '08; Assistant Entomologist, N. C. Department of Agriculture, '08-'12; Associate Professor of Zoology and Entomology, N. C. A & M, '12-'13; Professor, '13—

HORACE FLETCHER SPURGIN, FIRST LIEUTENANT U. S. A.
Professor of Military Science and Tactics

West Point, Class of '06; Fort Washington, Md., in defense of Washington, D. C., '07-'10; Fort Monroe, Va., Student Officer Artillery School, '10-'11; Fort Crockett, Texas, in defense of Galveston, Texas, '11-'13; Professor of Military Science and Tactics, N. C. A & M, '13—

THOMAS EVERETT BROWNE, A.B.
Professor of Agricultural Extension

A.B., Wake Forest College, '02; Instructor of Latin and Higher English, Atlantic Collegiate Institute, Elizabeth City, N. C., '02-'04; Superintendent of Public Instruction, Hertford County, N. C., '05-'11; County Agent in Farmers' Cooperative Demonstration Work, Hertford County, '08-'11; District Agent in F. C. D. Work in Eastern North Carolina, '11-'13; Assistant State Agent in F. C. D. Work and Superintendent of Extension in charge of Boys' Corn Clubs, '13—; Professor Agricultural Extension, N. C. A & M, '13—

WILLIAM ROSWELL CAMP, A.B.
Professor of Agricultural Economics

A.B., Leland Stanford, Jr., University, '09; Graduate Student, '09-'11; Graduate Student and Teaching Fellow, University of Missouri, '11-'12; Professor of Social Sciences, Lombard College, '12-'13; Professor of Economics, N. C. A & M, '13—

BENJAMIN FRANKLYN KAUPP, D.V.M., M.S.
Professor of Poultry Science

D.V.M., Kansas City Veterinary College, '95; Veterinary Inspector, U. S. Bureau of Animal Industry, '96-'04; Professor of Parasitology and Physiology, Kansas City Veterinary College, '96-'04; Director of Anatomy Laboratory and Clinic, '04-'08; Pathologist, Colorado Experiment Station, '08-'12; Professor of Pathology, Colorado State College, '08-'12; Special Student in Pathology, University of Chicago, Summer, '08; M.S., Colorado State College, '09; Commissioner of Public Health, Spartanburg, S. C., '12-'14; Author of "Animal Parasites and Parasitic Diseases," and "Poultry Diseases and Their Treatment"; Poultry Investigator and Pathologist, N. C. Agricultural Experiment Station, '14—; Professor of Poultry Science, N. C. A & M, '14—

Assistants and Instructors

CHARLES MCGEE HECK, A.B.
Associate Professor of Physics

A.B., Wake Forest College, '00; M.A., Columbia University, '01; Student of Physics in Berlin, '02-'03; Professor of Physics, University of Nebraska, '04-'11; Professor of Physics, Colorado College, '12-'13; Assistant Professor of Physics, N. C. A & M, '13-'14; Associate Professor, '14—

GEORGE SUMMEY, JR., PH.D.
Assistant Professor of English

A.B., Southwestern Presbyterian University, '97; Ph.D., '01; Student, University of Leipzig, '01-'02; Instructor in English, N. C. A & M, '03-'09; Assistant Professor, '09—

WELDON THOMPSON ELLIS, B.E., M.E.
Assistant Professor of Machine Design and Steam Laboratory

B.E., N. C. A & M, '06; M.E., '08; Assistant Professor of Machine Design and Steam Laboratory, N. C. A & M, '07—

LEON FRANK WILLIAMS, A.B., A.M., PH.D.
Assistant Professor of Chemistry

A.B., Trinity, '01; A. M., '02; Ph.D., Johns Hopkins, '07; Assistant Professor of Chemistry, N. C. A & M, '07—

HENRY K. MCINTYRE, E.E.
Assistant Professor of Physics and Electrical Engineering

E.E., Columbia University, '99; with Sprague Electric Co., '99-'00; New York Telephone Co., '00-'07; Grey Electric Co., '07-'08; Special Work in Electrical Engineering, '07-'08; Assistant Professor of Physics and Electrical Engineering, N. C. A & M, '09—

CHARLES BENJAMIN PARK
Instructor in Machine Shop and Assistant in Power Plant

Graduate Raleigh Male Academy, '82; Machinist for Seaboard Air Line Railroad, '82-'89; Instructor in Machine Shop and Assistant in Power Plant, N. C. A & M, '90—

ABRAHAM RUDY, A.M., PH.D.
Assistant Professor of Modern Languages

A.B., Polytechnic Institute, Riga, Germany, in Modern Languages, '85; A.M., University of New York, '02; Ph.D., '01; Public School Teacher with Certificate, in Iowa, Nebraska, New York, '85-'02; in Philippine Islands, '04-'07; Instructor in Modern Languages, N. C. A & M, '07-'14; Assistant Professor, '14—

JOHN EDWARD HALSTEAD, B.S.
Instructor in Dyeing

B.S., Leeds University, England, '95; Chemist, Large Carpet Factory, Yorkshire, England, '96-'98; in charge of Chemistry and Dyeing Department, Leicester Technical College, England, '98-'99; Assistant Dyer in Large Dye Works in Yorkshire, England, '00-'01; Assistant Manager of Cotton Piece Dyeworks, Yorkshire, England, '01-'07; Instructor in Dyeing, N. C. A & M, '08—

HERBERT NATHANIEL STEED
Instructor in Weaving and Designing

Special Textile Student, N. C. A & M, '03-'05; Assistant Instructor in Carding and Spinning, '05-'06; Instructor in Weaving and Designing, '06—

FRED BARNETT WHEELER, B.E.
Instructor in Wood Shop and Pattern Making

B.E., N. C. A & M, '12; Instructor in Forge, '07-'12; Instructor in Wood Shop and Pattern Making, '12—

JOHN WILLIAM HARRELSON, B.E.
Instructor in Mathematics

B.E., N. C. A & M, '09; Instructor in Mathematics, N. C. A & M, '09—

VERGIL CLAYTON PRITCHETT, A.B., M.S.
Instructor in Physics

A.B., Elon College, '07; Harvard Summer School, '07; Instructor in Physics, Elon College, '08-'09; M. S., University of North Carolina, '10; Instructor in Physics, N. C. A & M, '10—

RUBLE ISAAC POOLE, B.E., C.E.
Instructor in Civil Engineering

B.E., N. C. A & M, '08; C. E., Cornell University, '10; Instructor in Civil Engineering, N. C. A & M, '10—

HARRY TUCKER, B.A., B.S.
Instructor in Mathematics and Civil Engineering

A.B., B.S., Washington and Lee University, '10; Instructor in Physical Culture, Washington and Lee University, '09-'10; Draftsman, Roanoke Bridge Co., Summer, '11; Student, Summer Law School, Washington and Lee University, '12; Instructor in Mathematics and Civil Engineering, N. C. A & M, '10—

LILLIAN LEE VAUGHAN, M.E.
Instructor in Mechanical Engineering Laboratory

B.E., N. C. A & M, '06; M.E., '09; M.E., Columbia University, '11; Instructor in Mechanical Engineering Laboratory, N. C. A & M, '12-'14; Assistant Professor of Experimental Engineering, '14—

LAFAYETTE FRANK KOONCE, B.S., D.V.S.
Instructor in Veterinary Science

B.S., N. C. A & M, '07; D.V.S., Kansas City Veterinary College, '09; Practitioner, '09—; Instructor in Anatomy and Clinics, N. C. A & M, '10—; Food Inspector, City of Raleigh, '13—

EDGAR ALLEN HODSON, B.S., M.S.
Instructor in Agronomy

Eighth District Agricultural School, Athens, Ala., '09; B.S., Alabama Polytechnic Institute, '11; Instructor in Agronomy, N. C. A & M, '12—

JULIUS WILLIAM PRATT, A.B., A.M.
Instructor in English

A.B., Davidson College, '08; Instructor in English, Georgia School of Technology, '08-'09; A.M., University of Chicago, '13; Instructor in English, N. C. A & M, '13—

EDWIN FREEMAN STODDARD, B.S.
Instructor in Horticulture

B.S., Pennsylvania State College, '13; Instructor in Horticulture, N. C. A & M, '13—

SCHUYLER MARSH SALISBURY, B.S.
Instructor in Dairying

B.S., Ohio State University, '13; Instructor in Dairying, N. C. A & M, '13—

EVERETT HANSON COOPER, B.S.
Instructor in Bacteriology

B.S., Massachusetts Agricultural College, '13; Instructor in Bacteriology, N. C. A & M, '13—

HARRY CURTIS YOUNG, B.S.
Instructor in Botany

B.S., Ohio University, '13; Instructor in Botany, N. C. A & M, '13—

ELMER ALDRICH RICKARD, A.B.
Instructor in Mathematics

A.B., Roanoke College, '12; Instructor in Mathematics, Sandy Valley Seminary, Paintsville, Ky., '12-'13; Instructor in Mathematics, N. C. A & M, '13—

HERMON BURKE BRIGGS, B.E.
Instructor in Shop and Drawing

B.E., N. C. A & M, '13; Instructor in Shop and Drawing, N. C A. & M, '13—

EDGAR BYRON NICHOLS, B.E.
Instructor in Forge

B.E., N. C. A & M, '13; Instructor in Forge, N. C. A & M, '12—

HENRY LEON COX, B.S.
Instructor in Chemistry

B.S., University of North Carolina, '14; Assistant in Chemistry, University of North Carolina, '13; Babbitt Scholar, '13-'14; Instructor in Chemistry, N. C. A & M, '14—

CHARLES WEBB DAVIS, A.B.
Instructor in Mathematics

A.B., Wake Forest College, '10; Instructor in Mathematics and Latin, Leaksville-Spray Institute, Leaksville, N. C., '10-'11; Principal, State High School, Godwin, N. C., '11-'12; Assistant, U. S. Biological Laboratory, '12-'14; Instructor in Mathematics, N. C. A & M, '14—

JAMES TALMAGE DOBBINS, A.B., A.M., PH.D.
Instructor in Chemistry

A.B., University of North Carolina, '11; Assistant in Physics, '10-'11; Fellow in Chemistry, '11-'12; A.M., '12; Ledeaux Fellow in Chemistry, '12-'14; Ph.D., '14; Alpha Chi Sigma Fraternity; Instructor in Chemistry, N. C. A & M, '14—

EDWIN LOUIS FREDERICK, A.B., PH.D.
Instructor in Chemistry

A.B., Johns Hopkins University, '11; Assistant in Chemistry, '11-'12; Hopkins Scholar, '12-'13; University Fellow, '13-'14; Ph.D., '14; Instructor in Chemistry, N. C. A & M, '14—

FIELDING FICKLEN JETER, A.B., A.M.
Instructor in Mathematics

A.B., Randolph-Macon College, '13; A.M., '14; Instructor in Mathematics, '12-'14; Instructor in Mathematics, N. C. A & M, '14—

HARVEY LANGILL JOSLYN, B.S.
Instructor in Soils

B.S., N. C. A & M, '13; Instructor in Agriculture, Craven County (N. C.) Farm-Life School, '13-'14; Instructor in Soils, N. C. A & M, '14—

DEAN W. MARTIN, B.S.
Instructor in Physics

B.S., Grove City College, '12; Laboratory Assistant, '11-'12; Instructor in Physics and Chemistry, New Bloomfield Academy, '12-'13; Graduate Work, Cornell University, '13; Graduate Work, University of Chicago; '13-'14, Instructor in Physics, N. C. A & M, '14—

CARLETON FRIEND MILLER, B.S., PH.D.
Instructor in Chemistry

B.S., Wesleyan University, '09; Assistant in Chemistry, Cornell University; Ph.D., Cornell University, '14; Sigma Xi Fraternity; Instructor in Chemistry, N. C. A & M, '14—

WILLIAM G. RICHARDSON, JR., M.E.
Instructor in Shop and Drawing

M.E., Lehigh University, '14; Instructor in Shop and Drawing, N. C. A & M, '14—

JAMES BLAINE SCARBOROUGH, A.B., A.M.
Instructor in Mathematics

A.B., University of North Carolina, '13; Assistant in Physics, '12-'13; Fellow in Mathematics, '13-'14; A.M., '14; Phi Beta Kappa Society; Instructor in Mathematics, N. C. A & M, '14—

WALTER BIVINS SMITH, D.V.M.
Instructor in Physiology and Pathology

D.V.M., Alabama Polytechnic Institute, '14; Instructor of Physiology and Pathology, N. C. A & M, '14—

KENNETH TRACY WEBBER, B.S.
Instructor in English

B.S., Colgate University, '13; Graduate Student, Harvard University, '13-'14; Instructor in English, N. C. A & M, '14—

RUTLEDGE HUGHES FEILD
Instructor in Entomology and Zoology Laboratory

Student, N. C. A & M, '11-'15; Instructor in Entomology and Zoology Laboratory, '14—

HERBERT SPENCER
Instructor in Entomology and Zoology Laboratory

Student, N. C. A & M, '11-'15; Instructor in Entomology and Zoology Laboratory, '14—

LAWRENCE EARL HINKLE, B.A.
Instructor in Modern Languages

B.A., University of Colorado, '11; Graduate Work, University of Chicago, '11; Harvard, '12; Princeton, '14; Assistant Professor of English and History, Morrisville College, Morrisville, Mo., '07-'09; Headmaster, Cokesbury Conference School, Cokesbury, S. C., '11-'12; Professor of Modern Languages, Northwestern State Normal, Alva, Oklahoma, '12-'14; Instructor in Modern Languages, N. C. A & M, '15—

Other Officers

E. B. Owen, B.S. *Registrar*
A. F. Bowen *Bursar*
H. McK. Tucker, M.D. *Physician*
A. B. Hurley *Steward*

Miss Lucile Anderson *Stenographer, Agricultural Department*
Miss Mary Bledsoe *Stenographer, Engineering Department*
Miss E. G. Griffin *Stenographer, Registrar's Office*

CLASSES

Senior Class Poem

Four years! how fast the time has flown,
 Too soon it seems to say good-bye;
And though our college course is done,
 We fain would linger, linger nigh.

Four years! ah, pleasures they have brought
 To us who must now go away;
What joys we've had with new-found friends,
 Those friendships in our hearts will stay.

Not all was pleasure; many a time
 When first we met, our hearts repined,
Before in friendship's holy bonds,
 Release from longings did we find.

Ah, yes! 'tis hard to say adieu,
 Oh! A and M, our college dear;
Our fondest thoughts shall be with you;
 And we shall leave you with a tear.

A tear perhaps; but life's ahead,
 Let others come and fill our place;
Forth to the battle we must go;
 Farewell! we leave thee now in peace.

DIPLOMA
JOB
SENIORS

History of the Senior Class

The record of the Class of 1915 is that of a natural, harmonious development from uncouth Freshmanhood to dignified Seniority. The following record, though brief and incomplete, will show that the class in its growth and various activities has made a distinctive record during its stay at A & M.

On the seventh of September, 1911, one hundred and sixty-two young men from all parts of North Carolina and sister states gathered on the A & M campus to embark on a four-year college course. This number was made up of castes varying all the way from undignified, reserved country rusties to disdainful city high school graduates. But the barriers of caste and lack of acquaintance began to crumble away when we met in Pullen Hall to elect officers for the Class of 1915.

At the first meeting J. McK. Spears was elected to serve the class as temporary president. A few weeks later the class met and effected a permanent organization with W. T. Grimsley as its leader. Under his leadership we learned the spirit of cooperation and loyalty to our class and to our college.

A summer's vacation decreased our number as Sophomores to one hundred and eleven. Some were lost, others strayed, and a few were stolen. This year B. W. Setzer was chosen to pilot the class, and he was the right man in the right place. He taught us to respect the rights of our newly-gained friends, and we stood by him in his principles. Under his leadership we caught the true A & M spirit and the individual members of the class began to take a lively interest in the various activities of college life.

Again a vacation passed and eighty-two Juniors answered to the roll call. J. McK. Spears, who was our temporary president in our Freshman year, was selected as the man best fitted to pilot us through that transient period from under-classmen to Seniors. This year the class lost most of its resemblances to other classes, not only taking the lead in scholarship, but also assuming the lead in the various college activities as well.

Aother summer's vacation was enjoyed and the call was made for the last charge. It was in this year that the real strength of our class was exemplified in its clean, unassuming, yet resolute adherence to duty. For the final march towards the coveted goal of our ambition, sixty-seven men rallied around the colors of the Red and White under the leadership of F. K. Kramer. This man excellently carried into effect the honor and duty conferred upon him, and he has been a prominent figure in molding the ideals and shaping the destiny of the

Class of 1915. It has been his constant ideal to cooperate with the Faculty for the advancement of his class and for the betterment of A & M.

In class athletics we have not made any startling records, but we have made a creditable showing. Our football team won the class championship in our Junior year, and tied the Juniors for the loving cup in our Freshman year. Although we have not won any of the class championships in baseball, our teams have always made a good showing and have proven worthy of our support. In 'Varsity athletics our class has been represented in all four branches—football, baseball, basketball, and track. We must not forget those men who have worked so faithfully on the scrub teams, for they have contributed not a little towards the success of our 'Varsity teams.

From the outset, ours has been a class that believed in doing things. We have furnished the largest number of honor men of any class in the history of the college, thirteen men having made honors in scholarship for four years. But we have not confined our energies to scholarship alone, our men having ever taken a high standing in all the various activities. The standard of the college publications has been raised under the direction of our class. Our men have added new life to the Y. M. C. A., literary societies, and the many technical clubs. We have instituted at A & M a system of inter-collegiate debates which is calculated to give the college as much publicity as any other one movement. The class also organized a stock judging team, which defeated the strong V. P. I. team at the State Fair in 1914. The members of our class have loyally supported the honor system and have contributed largely towards its success at A & M. At this point we would not forget the many men who have done outside work to defray their college expenses, as they are indeed a credit to the class.

We have now gathered around the festive board for the last time as undergraduates. We can hardly realize that our college career, which has been intermingled with joys and disappointments, will soon be a thing of the past. The day is fast approaching when we shall be called upon to take our places in the rank and file of humanity, and there work out our own destiny. As we go forth from these sacred walls, we do so with a feeling of sadness, for during our sojourn here we have come to love and cherish this institution and the lifelong friendships we have formed. May God's blessings go with each and every one of us, and may we prove a credit to ourselves, an honor to our college, and loyal and patriotic citizens of our State.

HISTORIAN.

Senior Class Officers

F. K. Kramer, *President*
H. B. Constable, *Vice-President*
L. C. Atkisson, *Secretary and Treasurer*
J. S. Howard, *Historian*
M. L. Correll, *Poet*
J. B. Bruner, *Prophet*

HENRY MILTON ALEXANDER, "Red Alex," "Pinkie" Matthews, N. C.

Electrical Engineering

"A sound mind in a sound body."

Age, 20 Height, 5 -8½" Weight, 150

Electrical Engineering Society, President (4); Corporal; First Sergeant; Captain Company F; Punctuality Roll (3), (4); Y. M. C. A.; Mecklenburg County Club, Vice-President (3), President (4); Vorwarts Verein, Secretary (3).

"Red Alex" stands out prominently as the only strawberry blonde among the electrical seniors. He takes life as he finds it and never gets angry. It is positively against his rule to hand in experiments on time. Alex had a hard time choosing a sponsor for his company, but it is said that he has kept Cupid busy since making his choice.

LEWIS CARROLL ATKISSON, "Elsie" Greensboro, N. C.

Textile

"For all my books are a woman's looks,
And studies, her enchantments."

Age, 20 Height, 6'-0" Weight, 150

Gang; Corporal; Class Cheer Leader (2); Manager Class Basketball Team (2); Class Treasurer (3); Guilford County Club, Secretary (2); Textile Society, Secretary and Treasurer (2); Assistant Manager Track Team (3), Manager (4); Second Lieutenant Company B; Business Manager *Wau Gau Rae* (4); Class Secretary (4); Y. M. C. A.

It is a common occurrence to see "Elsie" leaning out of a window of the Textile Building fondly watching the trains. We hardly think he will follow the Textile Industry as he has a fondness for anything pertaining to a railroad.

BEVERLY MOSS BLOUNT, "B. M."
Washington, N. C.

Mechanical Engineering

"The world knows not of my knowledge."

Age, 20 Height, 5'-10" Weight, 150

Company "Q"; Vorwarts Verein; Punctuality Roll (1); Honors in Scholarship (3); Sons of Rest; Corporal; Sergeant; Mechanical Engineering Society, Secretary and Treasurer (4); Y. M. C. A.

"B. M." is a good student and makes good grades. Any one with a fluent line like he has is bound to make grades, as the teacher will give him a few points to get him to shut up. When it comes to theory Blount has no equal, but he will admit there are a few who can keep up with him in practice.

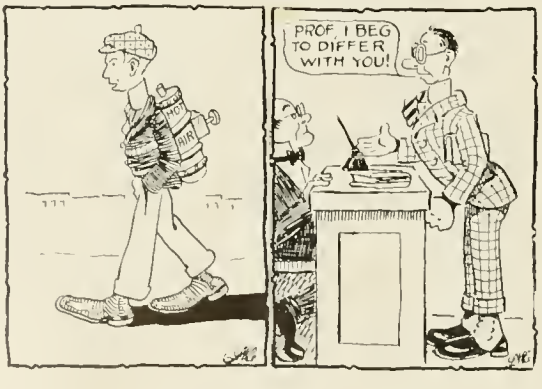

JOSEPH BRANDON BRUNER, "Bull"
Raleigh, N. C.

Agriculture

"Let me live in a house by the side of the road and be a friend to man."

Age, 20 Height, 6'-0" Weight, 177

Pi Kappa Alpha Fraternity; Leazar Literary Society; Scrub Football (2), (3), (4); Class Football (2), (3), (4); Class Prophet; Rural Science Club; Biological Club; Company "Q"; Plant Industry Club.

The man who had, truly, rather argue than eat. He has never worried over his studies,—not until about a week before exams. Possessing the gift of prophecy, he is official foreteller of his classmates' destinies. Among the ladies he shines, and is verily a Socrates upon the subject of Feminism. "Bull" is an authority on Argentine, its possibilities, and its senoritas.

JOHN CLINE CARPENTER, "J. C.," "Cline"
Charlotte, N. C.

Civil Engineering

"Night after night,
He sat and bleared his eyes with books."

Age, 25 Height, 5'-11" Weight, 170

Class Baseball (3); Class Basketball (3); Honors in Scholarship for Four Years; "Hornets" Club; Civil Engineering Society; Pullen Literary Society; Company "Q"; Business Manager *Red and White*; Y. M. C. A.

When Cline first appeared on the diamond we thought we had a find, but unfortunately the call of the books was stronger and our supposed star gave up baseball. Now he holds a position on our all-star exempt team. He is one of the few members of the C. E. Seniors who has no bad habits.

JOHN MANN CARTER, "Monk"
Washington, N. C.

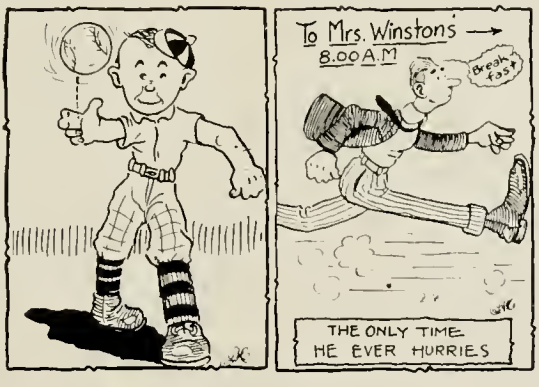

Electrical Engineering

"He is well paid that is well satisfied."

Age, 20 Height, 5'-7" Weight, 140

German Club; Electrical Engineering Society; Beaufort County Club; Y. M. C. A.; Track (2), (3); Company "Q."

"Monk" missed his calling by not becoming a lawyer, for he will argue with anybody and, in most cases, takes the least substantial side of the question. His greatest trial has been in endeavoring to convince some one that the ladies are fond of him. His highest ambition is to become a salesman for the General Electric Company and he hopes to use his political influence in landing the job.

EDWARD LAMAR CLOYD, "Bishop," "Eddie"
Lenoir, N. C.

Mechanical Engineering

"Perpetual effort is the price of gain."

Age, 23 Height, 5'-9" Weight, 135

Honors in Scholarship (1); College Orchestra, Leader (1); Y. M. C. A., Vice-President (3); Leazar Literary Society, Vice-President (3); Orator Inter-Collegiate Peace Contest (3); Inter-Society Orator (3); Mechanical Engineering Society, Secretary and Treasurer (4); Company "Q."

"Bishop" belonged to the class of '14, but owing to eye trouble dropped out and now graduates with us. The street cars are not fast enough for him, so he brings his auto to school. When in his machine it is hard to tell whether he or Dr. Hill is President of A & M. Pleasures do not interfere with Eddie's duties.

GUY WINSTON COMMANDER, "Dux"
Elizabeth City, N. C.

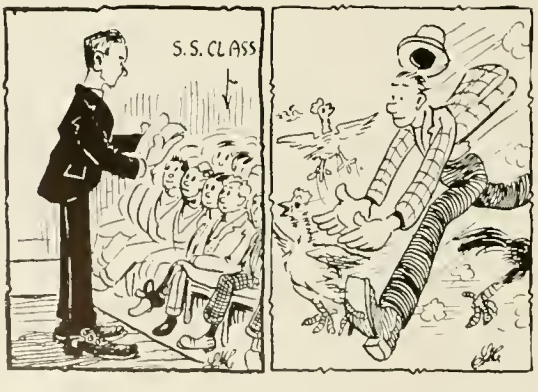

Agriculture

"My mouth runs itself."

Age, 20 Height, 6'-1" Weight, 170

Corporal; Sergeant; Company "Q"; Baa and Bellow Club; Class Baseball.

Commander is one of our future "Vet." doctors, and intends going to school some more for further preparation. He is a frequenter of Raleigh, and especially Fayetteville Street. Regardless of these side trips, "Dux" takes great interest in his work and makes good grades in all his subjects. He takes his fun whenever and wherever he finds it.

HENRY BACON CONSTABLE, "Bunny"
Charlotte, N. C.
Chemistry

"He was of the clay of God's Gentlemen."

Age, 21 Height, 5'-11" Weight, 148

Sigma Nu Fraternity; Vice-President Class (4); Athletic Assnciation, Secretary and Treasurer (4); Berzelius Chemical Society, President (4); Associate Editor AGROMECK; German Club, Floor Manager (4); Corporal; Sergeant; Captain Company D; Class Basketball; Y. M. C. A.

"Bunny" through his good disposition and friendly ways has made friends that will always be glad to meet him in future days. And we feel sure that some day not only his college friends but the chemical world will find in him a man true to his ambition, i. e., the discoverer of the "Bunny Mole-cule."

MILTON LEE CORRELL, "Dock"
Lumberton, N. C.
Chemistry

"Self trust is the essence of heroism."

Age, 21 Height, 5'-11" Weight, 168

Kappa Sigma Fraternity; Saints; German Club, President (4); Athletic Association, Vice-President (3), President (4); Baseball (2), (3); Coach Class Baseball (2), (3); Class Poet (4); Berzelius Chemical Society.

Here's "Harry Bank," too fast for college ball, so last year the sensation of the South Atlantic League. As "El Toro" artist he is unequaled. His favorite arguments, "beer is a food," and why mint juleps were created for the express delectation of mankind, show him to be a chemist of no mean ability. We have never met a better fellow.

EDWARD LIVINGSTON COTTON, "Eddie"
New London, N. C.

Mechanical Engineering

"In every rank, great, or small
'Tis industry supports us all."

Age, 22 Height, 5'-9" Weight, 135

Mechanical Engineering Society; Corporal; Sergeant; Second Lieutenant Company A; Class Baseball, Captain (3); Stanly County Club, President (4).

Eddie registered in Mechanical Engineering, but he believes that no man should spend too much valuable time studying when the need for money is so great. With this idea of commercialism he established a pressing club and several apple stands. All of his time, that is not devoted to collecting apple money and clothes for the pressing club, is given to study.

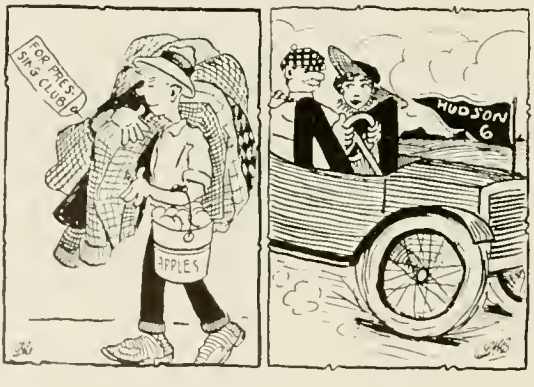

RAYMOND CROWDER, "Ray"
Raleigh, N. C.

Electrical Engineering

"My mind to me a kingdom is."

Age, 21 Height, 6'-4" Weight, 160

Gang; Honors in Scolarship (2); Punctuality Roll (2); Assistant Manager Track Team (3); Corporal; Sergeant; First Lieutenant Band; Y. M. C. A.; Electrical Engineering Society, Secretary-Treasurer (4); Assistant Business Manager AGROMECK.

In spite of the fact that Raymond is a counterpart of Mutt split in halves, he is some "hot shot" among the ladies. Probably it is his intellect they admire for he certainly knows practical electricity, and incidentally, a little about slowing down to sixty miles an hour when passing A & M.

DALLAS THORNTON DAILY, "Ergs," "Nish"
Elizabeth City, N. C.

Civil Engineering

"Thy voice
Is a celestial melody."

Age, 20 Height, 5'-10" Weight, 165

Secretary Class (3); Class Baseball (2), (3), Captain (2); Class Football (2), (3), Captain (3); Class Basketball (3); Assistant Manager Basketball Team (3), Manager (4); Scrub Baseball (2), (3); Civil Engineering Society; Elizabeth City Club; Second Lieutenant Company F; Vice-President Athletic Association; Y. M. C. A.

"Nish" is one of the most congenial men of our class. For the past three years he has held that coveted position of "warming-up" our star slabmen. In class athletics he has been our mainstay, and without him we would have been in a precarious condition.

LEONIDAS POLK DENMARK, "Polk"
Raleigh, N. C.

Civil Engineering

"I came; I saw; I conquered."

Age, 22 Height, 5'-8" Weight, 150

Class Football (1), (2); Corporal; Sergeant; Honors in Scholarship (1), (2); Class Basketball (3); First Lieutenant Company H; Civil Engineering Society; Business Manager AGROMECK; Y. M. C. A.

Polk holds the position of official draftsman for C. E. Poole, R.I. He is also leader of the Raleigh Boy Scouts, an organization for the uplift of the "Bushwomen." With his kodak he supplies the pages of this book with snapshots, while with his head he looks after its business affairs. He is an authority on all happenings at Meredith.

CHARLES PATTERSON ELDRIDGE, "Charley"
Raleigh, N. C.

Civil Engineering

"I never felt the kiss of love,
Nor maiden's hand in mine."

Age, 20 Height, 5'-10" Weight, 160

Class Track (1); Class Football (2); Class Basketball (2); Corporal; Track Squad (2), (3), (4); Honors in Scholarship (3); Leazar Literary Society; Civil Engineering Society; Company "Q"; Y. M. C. A.

Another of those Raleigh boys. It is rumored that Charley was at one time a member of those terrible "Bushwomen." We have our doubts about this for he never throws rocks, his hurling being limited to chalk. He possesses that wonderful power of getting out of examinations without legging or studying.

WILLIAM KING ELDRIDGE, "Cutie"
Burkeville, Va.

Mechanical Engineering

"Love was and is my Lord and King."

Age, 21 Height, 6'-0" Weight, 146

Company "Q"; Y. M. C. A.; Sergeant; Old Dominion Club, Secretary and Treasurer (4); Honors in Scholarship (1), (2).

"Cutie" is king among the ladies. He is a good student while at college, but his social duties require him to be away a great deal, especially at night. Seven nights in each week are used for calling, and part of each day is spent in calling over the telephone. The remainder of his time is devoted to hard study.

'15 AGR MECK

RUTLEDGE HUGHES FEILD, "Rusty"
Raleigh, N. C.
Agriculture

"I dare do all that may become a man;
Who dares do more is none."

Age, 21 Height, 5'-10" Weight, 125

Pi Kappa Alpha Fraternity; Alpha Zeta Fraternity; Honors in Scholarship for Four Years; Punctuality Roll (1), (2); Bi-Ag Society; Biological Club; Corporal; Sergeant; Company "Q"; Plant Industry Club.

That he is one of the smartest men of his class has been recognized in conferring the assistantship in Zoology and Entomology upon him. He is polite and courteous; and never leaves anything for tomorrow which can be done today. He has never been known to get mad, and takes all "kidding" with a broad grin.

AARON CONARD FLUCK, "Preacher"
Lexington, N. C.
Electrical Engineering

"Gentle in manners but resolute in deed."

Age, 20 Height, 5'-10" Weight, 148

Leazar Literary Society, Secretary (3); Associate Editor *Red and White* (3), (4); Electrical Engineering Society; President (4), Critic (4); Punctuality Roll (1), (2), (3); Honors in Scholarship for Four Years; Y. M. C. A.; Sergeant; Captain Company H; Vorwarts Verein, President (3).

"Preacher" amuses himself securing honors in punctuality and scholarship. He was rightly given the initials A. C., for Alternating Currents is like A B C to him. He has done well as Cadet Captain and as President of the Electrical Society. For three years "Preacher" was a silent admirer of Peace, but is now an enthusiastic Meredithian.

LOUIS WILLIAMS GARDNER, "Shelby"
Shelby, N. C.

Electrical Engineering

"How dear to my heart is the call of the siren."

Age, 20 Height, 5'-10" Weight, 142

Sigma Nu Fraternity; Corporal; Sergeant; First Lieutenant Company D; Electrical Engineering Society; Y. M. C. A.

"Shelby" is a booster of his town and a hand with the ladies for fair. If there are two things he is proficient in, they are his military genius and his success in falling in love, then falling out. It is known on the campus that "Shelby" did finally pass off his Math., but to outside appearances he failed in his other desires completely

PETER MELVIN GILCHRIST, "Chute"
Laurinburg, N. C.

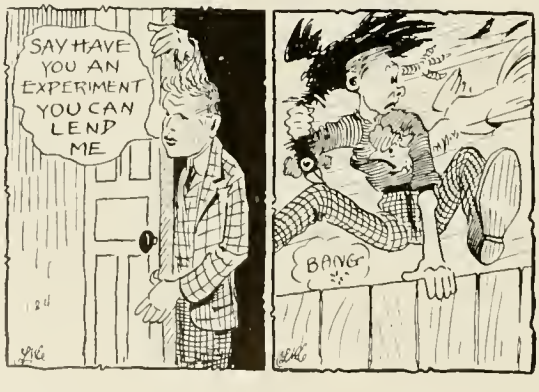

Agriculture

"Who can foretell for what high cause
This darling of the gods was born?"

Age, 23 Height, 5'-9" Weight, 136

Biological Club; Stock Judging Team; Rural Science Club; Tennis Club; Company "Q"; Baa and Bellow Club; Y. M. C. A.

He is a splendid lad and a favorite among the boys. He abounds in good humor, and has a peculiar dry wit about him that makes him a welcomed member of any gathering. His work on class is of a high order, as he seldom lets his fun interfere with his studies. It is reported that "Chute" is chief fireman for the "New Dormitory Chicken Stew Establishment."

FRANK TEMPLE GRAY, "Shorty"
Cullasaja, N. C.

Mechanical Engineering

"Care to our coffin adds a nail no doubt."

Age, 23 Height, 6'-4" Weight, 192

Y. M. C. A.; Mechanical Engineering Society; Class Football (2), (3); Company "Q."

It is hard for "Shorty" to understand some things, but when once understood he has them for life. He has never been able to see why there are 2 pi radians in a circle. Most any night he and "Charlie" may be seen leaving the campus, starting on their mission of love, and they seldom return before the "wee sma' hours."

JAMES HOLMES HADDOCK, "Jim"
Richmond, Va.

Textile

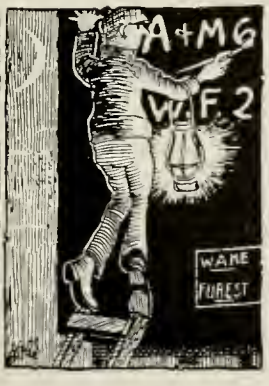

"My heart is ever at your service."

Age, 22 Height, 5'-9" Weight, 140

Gang; Old Dominion Club President (4); Textile Society, Vice-President (3); Corporal; Y. M. C. A.; Company "Q"; Punctuality Roll (3), (4).

Jim is the only one left of the tric who painted up Wake Forest. We fear that he is not a very ardent admirer of Raleigh as he has spent ninety days of this term with the Freshmen on the campus. He has a great fondness for railroading, for every time he sees anything that can be used for an engine he is playing train.

John Hubbard Hall, Jr., "Goat"
Rockingham, N. C.

Agriculture

"Company, villainous company, hath been the spoil of me."

Age, 20 Height, 5'-6" Weight, 130

Kappa Alpha Fraternity; Alpha Zeta Fraternity; Corporal; Sergeant; Assistant Editor-in-Chief Agromeck; Plant Industry Club; Honors in Scholarship for Four Years; Company "Q".

"Goat," as known by his many friends, is the lad with the John Bunny smile. Some people say that he is lucky, but those who know him best all agree that it is not luck but steady "plugging." "Goat" once harbored the idea of casting his lot in Argentina, but it is hinted that a pair of dreamy eyes of his native state have disillusioned him, and the lone trail lures him no longer.

Russell Peyton Harris, "R. P."
Louisburg, N. C.

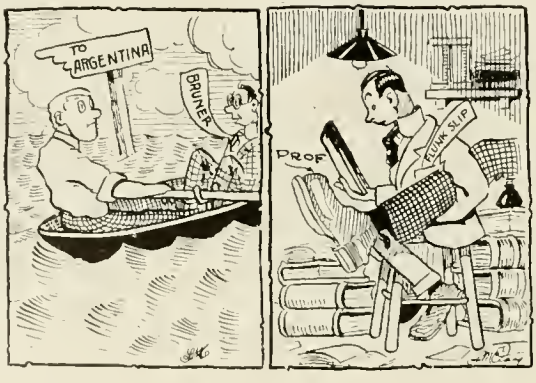

Agriculture

"The very pink of perfection."

Age, 20 Height, 5'-7" Weight, 130

Alpha Zeta Fraternity; Y. M. C. A., Vice-President, Leader Bible Study; Biological Club, President (4), Vice-President (3), Critic (4); Rural Science Club; Baa and Bellow Club; Bi-Ag Society; Pullen Literary Society, President (4), Critic (4); Track Team (1),(2),(3),(4); Tennis Club; Company "Q."

"R. P." never does anything that he thinks wrong, and does everything that he thinks right. It is rumored that he is a frequent visitor at "Pat's" room when there is a chicken feast on, but of course he is only doing missionary work on such occiasons.

HENRY MERCER HARSHAW, "Henry"
Murphy, N. C.

Electrical Engineering

"The clothes oft' bespeak the man."

Age, 21 Height, 5'-11" Weight, 150

Pi Kappa Alpha Fraternity; Electrical Engineering Society; Class Baseball (1), (2), (3), Captain (2); Assistant Manager Baseball Team (3); Company "Q."

Though Henry was a star on the third sack in class games, a higher ambition for the greater game of life has interfered with further development of this talent, for he devotes all spare time to visits to our sister college at Greensboro. He is the acknowledged Beau Brummel of the class. His frank and generous nature has made him many friends.

VERNON RAY HERMAN, "Sunshine"
Conover, N. C.

Agriculture

"A smile that glow'd
Celestial rosy red, love's proper hue."

Age, 23 Height, 5'-11" Weight, 160

Corporal; First Sergeant; Captain Company E; Class Football (1), (2), (3); Class Basketball (4); Honors in Scholarship; Catawba County Club, President Leazar Literary Society; Plant Industry Club.

"Sunshine" is he of the gay countenance, rosy disposition, and beaming personality. He is studying agronomy and is going back to the farm, where he will make good. He played class football and was as brilliant as his nickname. For diversion he took to the military life and had the distinction of being captain of the best drilled company.

DANIEL LEE HOOPER, "Deely"

Cullowhee, N. C.

Mechanical Engineering

"The practical man counts."

Age, 22 Height, 5'-10" Weight, 160

Mechanical Engineering Society, Vice-President, President (4); Honors in Scholarship (1), (2); Punctuality Roll for Four Years; Corporal; First Sergeant; Major First Battalion; Manager Class Baseball Team (3).

Major Hooper is well known among the Freshmen. They all want "Deely" to cut their hair knowing that they will not only get a good hair cut but probably a "leg" on the Major. The barber's chair is not the only chair over which he presides, as he is president of the Mechanical Engineering Society, and is equally successful in this position.

HERNDON HOPKINS, "Hop"

Greensboro, N. C.

Agriculture

"Life is labor and death is rest."

Age, 21 Height, 5'-11" Weight, 150

Rural Science Club; Biological Club; Y. M. C. A.; Company "Q"; Plant Industry Club.

"Hop" is a good natured lad as well as good looking. Holds no grudge or spite against any man, except the man who invented work. O, how "Hop" does hate that fellow! It is said that he is an authority on the location of the watermelon patches and orchards in the vicinity of the College. His favorite subject was Drainage(?). He and "Teach" liked it so well that they volunteered(?) to spend a part of the holidays making a drainage survey of the college farm.

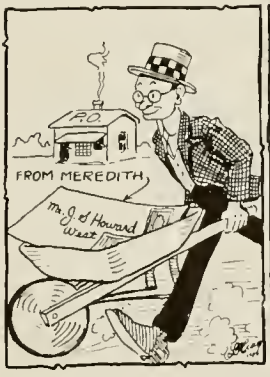

JOHN STUART HOWARD, "Dock"
Salemburg, N. C.
Agriculture

"Right thinking pays large dividends."

Age, 21 Height, 5′-8″ Weight, 150

Alpha Zeta Fraternity; Bi-Ag Society; Y. M. C. A., President (4); Leazar Literary Society, President (4), Vice-President (3), Critic (4), Secretary (2), Junior Debater, Sophomore Debater; Biological Club, President (4), Vice-President (3), Secretary (2); Rural Science Club; Corporal; Sergeant; Captain and Quartermaster (4); Class Historian (4); Commencement Marshal (3); Baa and Bellow Club; Stock Judging Team (4); Commencement Orator (4); Honors in Scholarship for Four Years.

He hails from the huckleberry ponds of Sampson, but during his four years with us the rings around his legs have faded. In addition to his course at A & M, he recites at Meredith every Monday afternoon, and his correspondence course also takes up much of his time.

GEORGE LINWOOD JEFFERS, "Jeff"
Richmond, Va.
Electrical Engineering

"Heart to conceive, the understanding to direct, or the hand to execute."

Age, 22 Height, 6′-1″ Weight, 170

Honors in Scholarship for Four Years; Punctuality Roll (1), (2), (3); Leazar Literary Society, Sergeant-at-Arms (2), Treasurer (3), Vice-President (4), Censor (4); Electrical Engineering Society, Vice-President (4); Old Dominion Club, Vice-President (4); Vorwarts Verein; Y. M. C. A.; Class Football (2), (3); Class Basketball (2), (3); Corporal; First Sergeant; Major Second Battalion; Commencement Orator (4).

"Jeff" is a brilliant combination of student, detective, and military genius. Although this honor-graduate hails from Virginia, he stands for strict prohibition. His being Major of the winning battalion in the competitive drill won him eminence; while his frequent visits to Meredith have won him success in the annual sponsor hunt.

WAVERLY FLETCHER KILPATRICK, "Pat"
Asheville, N. C.

Agriculture

"One word can charm all wrongs away,—
The sacred name of wife."

Age, 25 Height, 5'-9" Weight, 160

ROBERT VERNON KNIGHT, "Bob"
Tarboro, N. C.

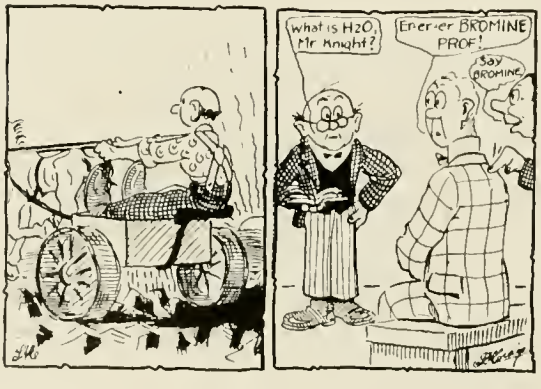

Agriculture

"Help me, Cassius, or I sink."

Age, 21 Height, 5'-11' Weight, 158

Corporal; Sergeant; Football Squad (2), (3); Class Football (2), (3); Treasurer Class (4); Tennis Club; Company "Q"; Plant Industry Club.

"Pat" is a typical Irishman, and proud of it, a good student and a good cook. He knows the exact location of every chicken roost in the community. During the Christmas holidays of his Senior year, he took unto himself a wife. Since then he has assumed an air of dignity and sobriety, symbolical of the new life into which he has entered.

German Club; Company "Q"; Baa and Bellow Club; Biological Club; Y. M. C. A.

"Bob" regrets that he was not born rich, rather than so good looking. Guessing is his profession, and dancing his pastime. He indulges in study now and then,—mostly then. He likes to be closely associated with his fellow classmates, as much on recitation as off. "Bob" is easy-going and accomodating,—always willing to do a favor for any one.

FRANK KIPP KRAMER, "Kipp"
Elizabeth City, N. C.

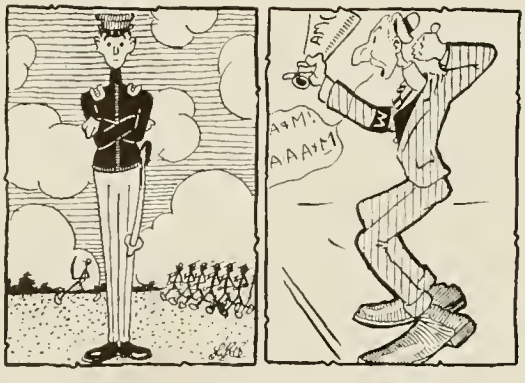

Mechanical Engineering

"He is a man, take him for all in all,
I shall not look upon his like again."

Age, 22 Height, 6'-2" Weight, 175

Sigma Phi Epsilon Fraternity; Honors in Scholarship for Four Years; Manager Class Football Team (2), (3); Sergeant Major; President Class (4); Mechanical Engineering Society, President (4); Lieutenant Colonel.

"Kipp" is A & M's first Lieutenant Colonel and in military affairs he has distinguished himself. He is an unusually hard worker and has proven himself to be a genius in his chosen profession. A majority of the higher honors have been justly conferred upon him, and when "Kipp" consults "the little Doctor" we usually get what we ask for.

JOSEPH RAOUL LEGUENEC, JR., "Leg"
Abbeville, La.

Civil Engineering

"As merry as the day is long."

Age, 22 Height, 5'-11" Weight, 155

Kappa Sigma Fraternity; Saints; German Club; Class Baseball (2), (3); Assistant Cheer Leader (3), Leader (4); Civil Engineering Society, President (4); Associate Editor *Wau-Gau-Rac*; Associate Editor AGROMECK; Company "Q."

His name brings back vacation memories and all that goes with same. He has more good jokes than there are fish in the park pond. Then too, he loves the ladies, and when it comes to gliding a number 'leven over a slippery surface he is unexcelled. His admirers among the fair sex are in constant fear of his being signed by some "Castle" scout.

IRVIN TRACY LEWIS, "I. T."

Gastonia, N. C.

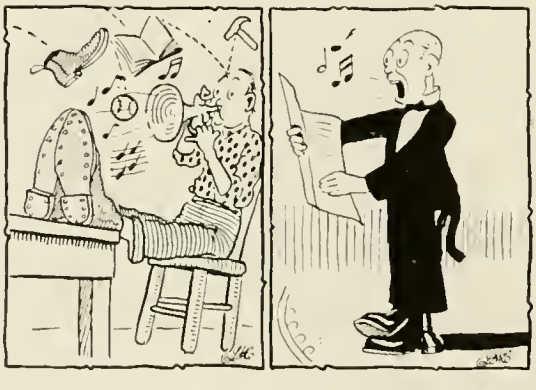

Agriculture

"I have
Immortal longings in me."

Age, 23 Height, 5'-'11' Weight, 175

Alpha Zeta Fraternity; Vice-President Class (2); Class Baseball (1), (2); Class Football (2), (3); Assistant Manager Football Team (3); Baseball Squad; Corporal Band; Sergeant Band; Company "Q"; Baa and Bellow Club.

This is the man Sousa is looking for, as a cornetist. "I. T." has helped out the college music greatly and a vote of thanks is due him. He is very quiet and unassuming and gets his work off without much trouble. He intends being a veterinarian one of these days,—that is if the fine art of music does not capture him unawares.

JESSE WEBB LINDLEY, "Van"

Siler City, N. C.

Agriculture

"Music the fiercest grief can charm"

Age, 25 Height, 5'-9" Weight, 168

Rural Science Club; Biological Club; Leazar Literary Society; Biological Club Quartette; Baa and Bellow Club; Company "Q."

"Van" is one of our musically inclined members, singing tenor on many and sundry occasions. He has had a deal of experience as a farmer and now with four years of theory, he should make things hum. He deserves a Carnegie hero medal for his display of bravery in indulging in a "tack." "Van" is very quiet, talks in a soft, easy voice—doubtless a case of conservation so that the gifts of a tenor role might not suffer injury.

'15 AGR MECK

DONALD GRATTON MCARN, "Mac"
Laurinburg, N. C.

Electrical Engineering

"Thy modesty's a candle to thy merit."

Age, 21 Height, 5'-10" Weight, 150

WILLIAM DANIEL MARTIN, "Bull"
Pelham, N. C.

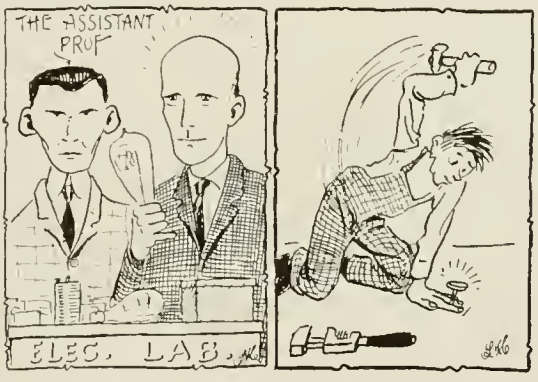

Mechanical Engineering

"Things are never known unless they are made known."
"Be it known that I am the 'bull' of the M. E. Class."

Age, 23 Height, 6'-0" Weight, 162

Electrical Engineering Society; Company "Q"; Assistant Instructor in Electrical Laboratory.

"Mac" is a genuine Scotch-Irish, and "his hair is just grizzled as in green old age." One would hardly guess that such a stoic has great ability for acquiring and keeping friends, and of all wonders, that he participates in midnight excursions. He is a good student, an authority on various makes of "slip sticks," an accumulator of manufacturers' catalogues, and all together, a good fellow.

Y. M. C. A., Cabinet (4); Mechanical Engineering Society, Vice-President (4); Honors in Scholarship for Four Years; Quartermaster Sergeant and Color Sergeant; Captain Company C.

Although from an unknown place called Pelham, Martin is an excellent student and rightly deserves the title of "Bull," which he bestowed upon himself. When any one needs help on Calculus or any branch of Mathematics, or if they want to know why hydrogen sulphide has such an offensive odor, they always call on "Bull."

ROBERT TIMBERLAKE NEWCOMB, "Bob"
Raleigh, N. C.

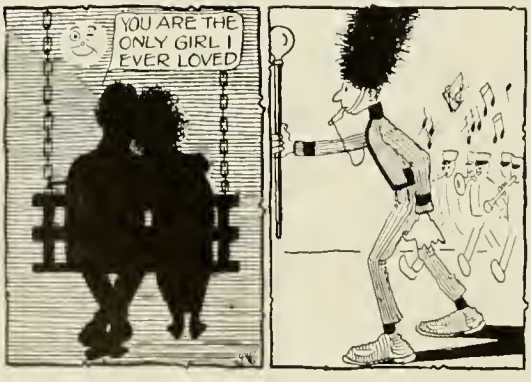

Agriculture

"Frame thy mind to mirth and merriment
Which bars a thousand harms and lengthens life."

Age, 20 Height, 5'-8" Weight, 150

Kappa Alpha Fraternity; Biological Club; Baa and Bellow Club; Stock Judging Team; Class Baseball (3); Saints; German Club; Company "Q."

"Bob's" rosy countenance usually greets us with a smile. The secret of his cheerfulness is that he never troubles trouble until trouble troubles him—which is not often. Even his numerous affairs with the ladies are unable to mar his good humor. Although his studies never worry him he has done well, as a medal from the stock judging contest goes to show.

KARL OSBORN, "Red"
Cleveland Mills, N. C.

Civil Engineering

"And let's be red with mirth."

Age, 22 Height, 5'-11" Weight, 165

Gang; Class Basketball (2), (3); Class Poet (3); Class Football (3); First Sergeant Band; Assistant Manager Baseball Team (3), Manager (4); Civil Engineering Society; Drum-major (4).

He decided to stay on the campus from Thanksgiving until March to arrange the baseball schedule. His band is one of the prides of West Raleigh; his hair the pride of the C. E. division. "Red" can make more noise than a boiler factory when he gets into an argument with "Rooky." He is an authority on the location of all chicken coops.

WILLIAM VICTOR PEARSALL, "Willie G."
Wilmington, N. C.

Chemistry

"Charm strikes the sight, but merit wins the soul."

Age, 22 Height, 5'-4" Weight, 130

Berzelius Chemical Society, Secretary-Treasurer; Y. M. C. A.; Band Sergeant, Second Lieutenant (3), Captain (4).

"Willie G." though small in stature contains a large amount of music and is leader of the New Dormitory North Section Band. He is somewhat of a "heart smasher," and when he is not to be found on the campus more than likely he is at the Doctor's house near the depot. He is a man true to himself and has many friends.

THOMAS CLAYTON PEGRAM, "Biscuits"
Asheville, N. C.

Textile

Man may live without friends;
He may live without books;
But here's one man that can't live without cooks.

Age, 21 Height, 6'-0" Weight, 155

Textile Society, President (4); Pullen Literary Society, Censor (4); Buncombe County Club, President (4); Sergeant; First Lieutenant Company E; Y. M. C. A.

"Biscuits" is the champion eater of the class. He has been known to eat twenty-six biscuits along with his dinner. Our fellow classmate has lately been smitten by Cupid and we fear that he is neglecting his work due to frequent visits to the "Lady of His Heart." The men of his company say that he is a promising soldier.

Asa Gray Phelps, "P. G."

Merry Hill, N. C.

Mechanical Engineering

"Low in stature, but tall in intellect."

Age, 21 Height, 5'-5" Weight, 170

Pullen Literary Society; Mechanical Engineering Society, Critic (4); Y. M. C. A.; Company "Q."

While our Asa Gray is not an authority on Botany, he is there when it comes to Mechanical Engineering. He may go a long time without saying anything, but when he does speak up he is always right. Those who know him best say he is in love and the regularity with which he goes to the Post Office points in that direction.

John Gay Pinner, "Gay"

Columbia, N. C.

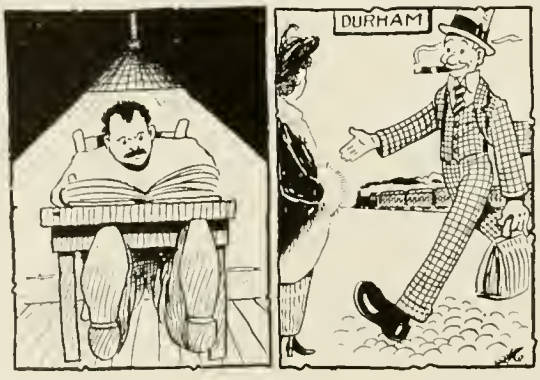

Agriculture

"The deed I intend is great,
But what, as yet, I know not."

Age, 21 Height, 5'-8" Weight, 140

Sigma Phi Epsilon Fraternity; Alpha Zeta Fraternity; Corporal; Sergeant; Company "Q"; Class Basketball (1), (2), (3), Captain (3); Class Baseball (3); Y. M. C. A.; Biological Club; Rural Science Club; German Club; Elizabeth City Club; Plant Industry Club.

"Gay" has a mania for falling for good looking and attractive young ladies, be they blonde or brunette. Even with such odds against him, he manages to make extra good grades in all subjects. He would appear to an outsider as being of a retiring disposition, but is there with the goods when you know him.

FRANK WILSON PROCTER, "Proc"

Raleigh, N. C.

Mechanical Engineering

"What shall it profit a man if he gain the whole world of knowledge and hath not a good time?"

Age, 21 Height, 5'-8" Weight, 140

Sigma Phi Epsilon Fraternity; Band (1), (2), (3), (4); German Club; Mechanical Engineering Society.

Frank, although living in Raleigh, makes A & M his home. He found out by experience that women and learning do not go together. The first years of his college life were spent among the ladies, but this last year has been in hard study. He believes so thoroughly in the value of Analytics that he has subjected himself to examination upon it three different times.

CARL CLAWSON PROFFITT, "Little Proffitt"

Bald Creek, N. C.

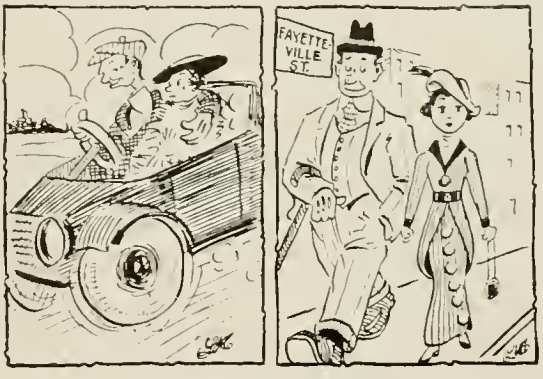

Agriculture

"If there is delight in love, 'tis when I see
That heart, which others beat for, beat for me."

Age, 22 Height, 6'-0" Weight, 165

Alpha Zeta Fraternity; Editor of *Red and White;* Baa and Bellow Club, Chief Herdsman; Y. M. C. A., Cabinet (4); Biological Club, Critic (4); Rural Science Club; Leazar Literary Society, Debating Team Manager; Alternate for Senior Debate; Assistant Librarian; Bi-Ag Society; Company "Q."

He has deep sense of right and justice, and thinks he loves every girl he meets, but he doesn't. He barely escaped matrimony in his Junior year, but now there is no danger, though it may seem that there is. He is a splendid student and a true optimist.

CHARLES LANDON PROFFITT, "Big Proffitt"
Bald Creek, N. C.

Agriculture

"The habit of expecting great things of ourselves calls out the best that is in us."

Age, 24 Height, 6'-2" Weight, 200

Y. M. C. A.; Scrub Football (1), (2); Sub Football (3); Football (4); Company "Q"; Baa and Bellow Club.

They say he never loved and he brags on the fact(?) himself, but "Teach" suspects that Cupid has captured him at last, since he has heard him talk in his sleep of an affair in eastern Tennessee. Football is his long suit; collecting the Book Store bills his business; and studying his pastime. He is big-hearted, generous and kind.

JOHN DUNCAN RAY, "Jack"
Sanford, N. C.

Agriculture

"Hath thy toil kept thee from thy peaceful slumber?"

Age, 21 Height, 6'-1" Weight, 165

Alpha Zeta Fraternity; Pullen Literary Society; Y. M. C. A., Secretary; Bi-Ag Society; Biological Club; Rural Science Club, President (4); Track (2), (3), (4); Class Historian (3); Baa and Bellow Club; Company "Q."

If "early to bed and early to rise makes a man healthy, wealthy, and wise" Jack will be puny, poor and foolish. But those who know him feel confident that he will be none of these; for he is some worker when he does rise and he stays at it late, though he doesn't hurt himself.

CHAUNCEY HARDWIC ROBERTS, "Chauncey"
Fletcher, N. C.

Agriculture

"Why am I ?"

Age, 22 Height, 5'-8" Weight, 140

Y. M. C. A.; Baa and Bellow Club; Biological Club; Company "Q."

Chauncey is really a part of all that he has ever seen, heard, or thought. No one ever suspected that "Chauncey" possessed the qualities of a ladies' man until through the sporting influence of "Little" Proffitt and "Dock" Howard he managed to break into society without being arrested. He is a musician of talent, a comedian of the wittiest type, and a fake salesman.

LANDON COATS ROSSER, "Kid," "Scoop"
Jonesboro, N. C.

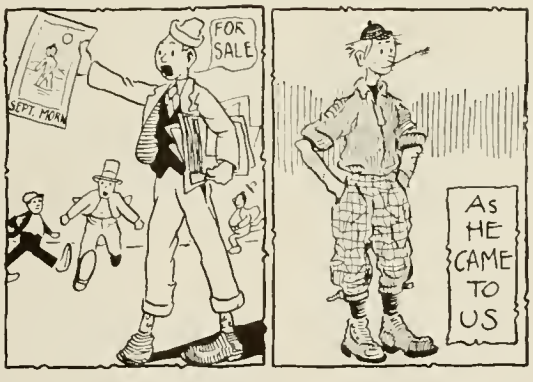

Electrical Engineering

"He wears the rose of youth upon him."

Age, 19 Height, 5'-6" Weight, 140

Electrical Engineering Society; Assistant Manager *Wau Gau Rac* (3); Honors in Scholarship (1); Punctuality Roll (1); Company "Q."

"Kid" was so little when he joined our class that we just had to give him his nickname. But his age was by no means in keeping with his learning ability, in spite of the fact that he does like to sleep in the day time. He has always been useful to the class, very modest, and a friend to everybody.

BROOKS WALKER SETZER, "Ikey"
Troutmans, N. C.

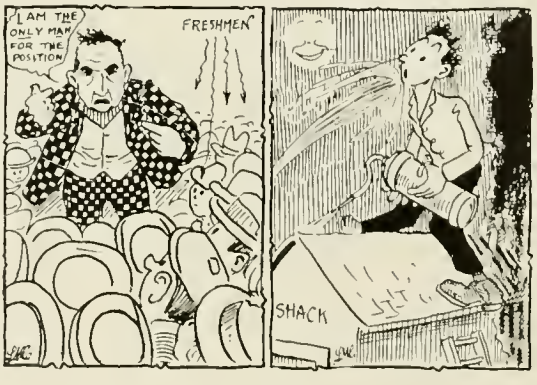

Electrical Engineering

"Three-fifths of him genius and two-fifths sheer fudge."

Age, 23 Height, 5'-7" Weight, 157

Gang; President Class (2); Manager Class Football Team (1); Corporal; Class Football (2); Leazar Literary Society, Secretary (2); Assistant Manager Football Team (3), Manager (4); Electrical Engineering Society; Assistant Editor-in-Chief *Wau Gau Rac* (3), Editor-in-Chief (4); Company "Q."

As brand new Freshmen we were deeply impressed with a certain noisy, little curly headed individual whom some one thought of calling "Ikey." At class meetings he always made the most emphatic speeches, which we sometimes heard with open mouths. In college politics he has achieved many honors.

WHITEFOORD INGERSOLL SMITH, "Burhead"
Asheville, N. C.

Textile

"Oh! bed, bed, bed, delicious bed,
That heaven on earth to a weary head."

Age, 20 Height, 5'-9" Weight, 140

German Club; Class Basketball (2), (3), Captain (2); Basketball Squad (2); Honors in Scholarship (2); Class Football (3); Buncombe County Club, Secretary (3), Vice-President (4); Tennis Club, President (4); Corporal; Second Lieutenant Company F (3); First Lieutenant Company B (4); Y. M. C. A.; Associate Editor AGROMECK.

When he smiles his face has an earthquake. Like all other members of his division, he sleeps almost as much as Rip Van Winkle. He has felt the touch of love but sternly spurned it. We are sure that if he returned to College next year he would receive a Captaincy.

WALTER JOHNSON SMITH, JR., "Johnnie"
Charlotte, N. C.

Agriculture

"What a spendthrift he is of his tongue!"

Age, 22 Height, 5′-8″ Weight, 140

Sigma Nu Fraternity; Second Lieutenant Company H; Biological Club; Y. M. C. A.; Associate Editor *Wau Gau Rac* (3); Stock Judging Team; German Club; Baa and Bellow Club.

"Johnnie" is an authority on many subjects, such as chickens (literal), live stock, etc., and is also well informed on all topics both local and foreign. He was on the stock judging team in his senior year. He holds the record of finishing his exams. in the shortest possible time, having never stayed on one over thirty-five minutes. "Johnnie" feels as much at home in Cameron Park as at A & M.

JOSEPH MCKAY SPEARS, "Joe," "Son"
Lillington, N. C.

Civil Engineering

"I have a heart with room for every joy."

Age, 22 Height, 5′-10″ Weight, 148

Kappa Alpha Fraternity; Saints; German Club, Secretary and Treasurer (4); Bugle Corps, Chief Trumpeter (3); Second Lieutenant Company D; Pullen Literary Society, Secretary (3); Civil Engineering Society; Marshal Senior Debate (2); President Class (3); Associate Editor *Red and White;* Alternate, Intercollegiate Debate (4); Senior Debater; Y. M. C. A.

Here is a man that works while he works and plays while he plays. He is always the same good fellow whether he is trying to apply the calculus method or shaking a mean foot to our present day, syncopated music. Among the ladies he is a wolf.

HERBERT SPENCER, "Spence"
National Soldiers Home, Va.

Agriculture

"Tho' modest, on his unembarrassed brow
Nature had written—Gentleman."

Age, 21 Height, 5'-11" Weight, 170

Alpha Zeta Fraternity; Bi-Ag Society; Rural Science Club, Vice-President (3); Biological Club, Secretary (2); Alternate, Honor System; Laboratory Assistant, Department of Zoology and Entomology (4); Captain Company A; First Sergeant; Corporal; Old Dominion Club; Debating Council (4); Honors in Scholarship for Four Years; Plant Industry Club.

Here is another really smart man, who doesn't overtax his brain "boning," but takes to knowledge like a duck to water. "Spence" was an Instructor in Zoology and Entomology in his senior year, and is also something of a military man.

DANIEL MCGILVARY TATE, "Danny"
Norlina, N. C.

Agriculture

"O Math, how I do love thee."

Age, 22 Height, 5'-8" Weight, 150

Leazar Literary Society; Rural Science Club; Class Baseball (1), (2), (3); Corporal; Sergeant; Company "Q"; (4) Baa and Bellow Club.

We wonder why he ever took Agriculture, for he is far more interested in marksmanship. No doubt when Uncle Sam learns of this expert rifleman he will call him from the plow to the battle field. In addition to his Agricultural course he is taking a special course in Math. For five years he has pursued Math. and yet he is not satisfied.

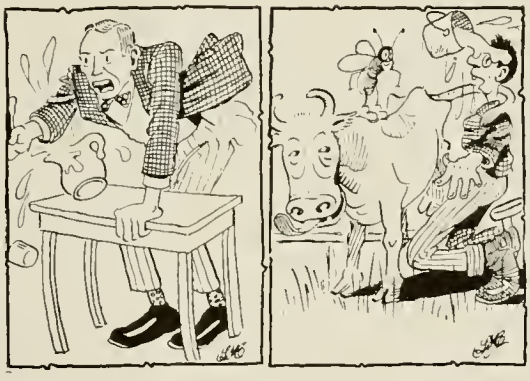

ARTHUR LEE TEACHEY, "Teach"
Teachey, N. C.
Agriculture

"Never let your studies interfere with your college duties."

Age, 25 Height, 5'-7" Weight, 130

Y. M. C. A.; Leazar Literary Society, President (4), Critic (3), Sophomore Debater, Junior Debater, Senior Debater, Chairman of Debating Council (4); Rural Science Club, Critic (4); Inter-collegiate Debating Committee (4); Commencement Orator; Biological Club; Associate Editor AGROMECK; Company "Q"; Plant Industry Club.

He missed his calling in not becoming a stump speaker, as he shines in oratory. He has volunteered to preach the gospel of scientific agriculture to the young hopefuls of our land. As manager of the College Book Store he has proven himself to be a good business man.

JESSE ERNEST TREVATHAN, "Jesse"
Rocky Mount, N. C.
Agriculture

"The man who makes a character, makes foes."

Age, 22 Height, 5'-8" Weight, 155

Pullen Literary Society, Censor (4), Chaplain (4), Debating Team Manager; Rural Science Club, Secretary and Treasurer (2), President (4), Corresponding Secretary (4), Intercollegiate Debating Committee (4); Biological Club, Treasurer (3); Y. M. C. A.; Comic Editor of *Red and White* (4); Dairy Manager (4); Baa and Bellow Club; Honor Roll for Four Years.

Jesse is a hard and earnest worker with a high sense of honor. Girls have no attraction for him unless they are interested in livestock. "Sunny Jim's" jokes strike an appreciative chord in his make-up.

JAMES HUGH WARD, JR., "Rooky"
Rocky Mount, N. C.

Civil Engineering

"Then he will talk—ye gods, how he will talk."

Age, 23 Height, 5'-7" Weight, 125

Corporal; Sergeant; Oak Ridge Club, Secretary and Treasurer (3); Company "Q"; Civil Engineering Society, Vice-President (4).

"Rooky" entered a year ahead of us, but decided to drop out and help construct the Norfolk Southern. It is thought that he contracted that style of expression so noticeable in northerners while on this work. One time we thought that he would develop into a track star, but he gave up the path to be manager.

WILLIAM MILLER WATSON, "Wuggie"
Swan Quarter, N. C.

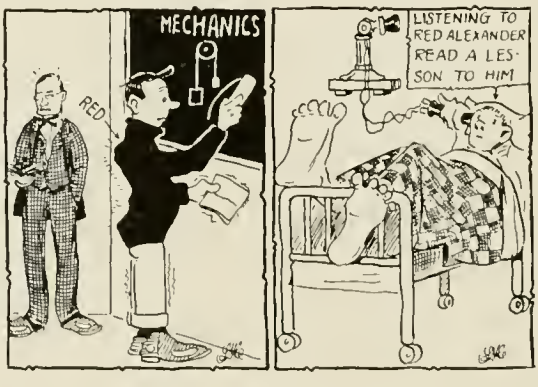

Electrical Engineering

"Labor itself is a pleasure."

Age, 20 Height, 5'-8" Weight, 140

Electrical Engineering Society; Vorwarts Verein; Y. M. C. A.; Company "Q"; Honors in Scholarship (1).

"Wuggie" hails from an unknown land where they plow with sails. Nothing pleases him more than to have a good book, his pipe, and a "lazy" chair; but, he is a very creditable electrician too. If you want to have a rousing laugh, get "Wuggie" in a good humor and have him tell you about getting out the cork.

CHARLES WRIGHT WEAVER, "Charlie"
Franklin, N. C.

Mechanical Engineering

"Begone, dull care! thou and I shall never agree."

Age, 21 Height, 5'-11" Weight, 176

Mechanical Engineering Society; Company "Q."

Charlie, coming from the "Mountain Dew" section of the State, is a typical mountaineer, afraid of no one. He flunked on chapel in his Junior year, but, under the guidance of Dr. Hill, he has removed this condition this year. If his aim in life is as true as his aim in the "mess hall" with a piece of bread, he will surely hit the mark.

BUXTON WHITE, "Buck"
Elizabeth City, N. C.

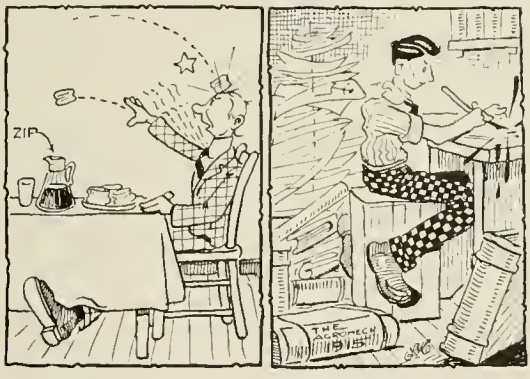

Agriculture

"There is a deal of deviltry beneath his mild exterior."

Age, 20 Height, 5'-10" Weight, 140

Kappa Alpha Fraternity; Alpha Zeta Fraternity; Bi-Ag Society; Y. M. C. A.; Biological Club; Rural Science Club; Corporal; Sergeant; Captain and Adjutant; Editor-in-Chief AGROMECK (4); Honors in Scholarship for Four Years; Plant Industry Club.

The AGROMECK breathes the spirit of this man, and without "Buck" this book could never have been. He is one of those fellows who can make A grades, and yet find time to mix with the boys. His soulful eyes and military bearing are a delight to the girls who happen to know him.

FREDERICK CARL WIGGINS, "Di-Nitro"
Middleburg, N. C.

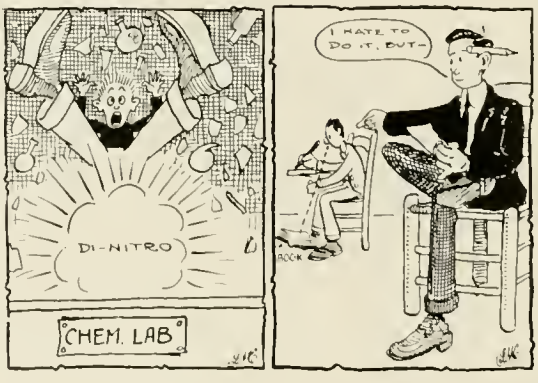

Chemistry

"Experience teaches slowly and at the cost of mistakes."

Age, 24 Height, 5'-8" Weight, 140

German Club; Leazar Literary Society; Class Track (1); Berzelius Chemical Society, Vice-President; Y. M. C. A.; Vorwarts Verein; First Sergeant; Captain Company B.

"Di-Nitro" is a hard worker, and a good student. He is most happy when worrying his friend "Jeff." His knowledge of chemistry is wonderful, especially of Di-Nitro-Benzene. Oh yes! If you want to know the latest college "dope" just ask him as he is "P.G's" right hand man.

JOHN RODMAN WILLIAMS, "Johnnie"
Sanford, N. C.

Civil Engineering

"An honest man's the noblest work of God."

Age, 21 Height, 5'-10' Weight, 150

Class Football (2), (3); Manager Class Baseball Team (2); Class Basketball (2); Vice-President Class (3); Sergeant; Scrub Football (3); Pullen Literary Society, Treasurer (3), President (4); Chairman Honor Committee (4); Civil Engineering Society, Treasurer (4); First Lieutenant Company C; Y. M. C. A.

"Johnnie" is one of those hard working, good fellows who help to develop all of us while in college. He is a man that can be counted on to do his part and do it well. The Senior Class, to show their confidence in him, entrusted the leadership of the Honor Committee to him.

JOHN WILDS WILSON, "Greenie"
Johnson City, Tenn.

Textile

"I am sure, care's an enemy to life."

Age, 22 Height, 5'-8" Weight, 142

German Club; Textile Society; Company "Q."

Greenie is a very ardent visitor at Meredith, and you will see him headed in that direction every time he gets a chance. He says that he would not be red headed and freckle faced for the world. His favorite pastime while on class is worrying "Biscuits." We don't think he will follow the Textile Industry but will head for the coal fields.

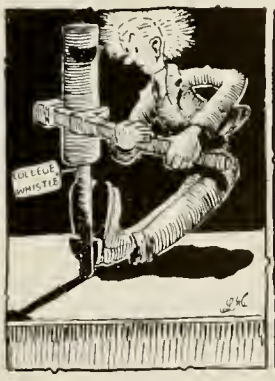

HENRY KOLLOCK WITHERSPOON, "Skin"
Greensboro, N. C.

Civil Engineering

"Love me little, love me long."

Age, 23 Height, 5'-11" Weight, 135

Gang; Glee Club (2),(3); Corporal; Sergeant; Class Historian (2); Assistant Manager Basketball Team (3); Guilford County Club, Vice-President (3); Assistant Circulation Manager *Wau Gau Rue* (3), Circulation Manager (4); Civil Engineering Society; Company "Q."

"Skin" claims to be the light weight champion "lady-killer" and we concede him the title. Once he thought of moving to Primrose Hall, but for some reason changed his mind. The city of Greensboro has a very strong attraction for "Skin," and we are inclined to believe there is "a woman in the case."

FORREST EGAN WYSONG, "Herr"
Greensboro, N. C.

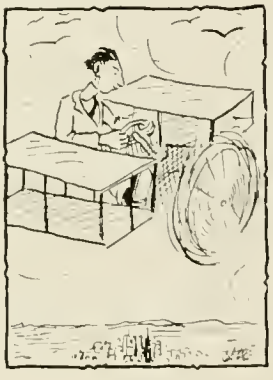

Mechanical Engineering

"Hitch your wagon to a star."

Age, 21 Height, 5'-10" Weight, 135

Leazar Literary Society; Mechanical Engineering Society, Critic (4); Y. M. C. A.; Vorwarts Verein, President; Company "Q."

No other man at A & M has ever had such high ideals as "Herr," in that he has attempted to fly. Not content with the theory of flight, he has actually undertaken the construction of an aeroplane. He says he does not expect to settle down when he graduates, but instead, expects to spend most of his time in the air.

Senior Class Prophecy

"So you are Fate," I said, beaming on the wonderful being before me.

"Yes," he answered, "Fate I am. On what mission have you sought me?"

"O most mighty sir!" said I, "I wish to know of the days to be, of the future seek I knowledge."

"Ah, mortal," he said, a strange light stealing over his countenance, "you cannot wish knowledge of *all* the future holds?"

"No, oh no! Not that," I quickly rejoined. "If only into the future could I look and see my classmates, the boys of 1915, see them after twenty years of struggle in the battle of life, see the rank that each has attained, then, then, O noble sir, would my heart's desire be fulfilled."

"Over here," said he turning, "is the Fountain of Destiny. Come."

I obeyed, and in a moment I was gazing spellbound on a scene that was dazzling in its grandeur and beauty. For a time I was fairly numb with terror and I could feel the cold beads of perspiration breaking out on my forehead. The heavenly being speaking at my side seemed far away, but his words came to me distinctly. "I shall leave you now. Look," said he, pointing to the great masses of snowy mist that were continually rolling upward, "and you shall see."

I turned to reply, but found myself alone. A sickening sensation of loneliness suddenly swept over me, but was quickly gone. The great clouds of spray as they rose and fell possessed an irresistible charm. One moment they were gorgeous with all the colors of the rainbow; the next blinding in their whiteness; again mottled with strange shadows that flitted about like shades of the dead. As I looked—the moving mass gradually assumed a transparency and the shadows seemed inside—yes, inside, and no—they were not shadows but people! The realization came to me in a flash.

It was evidently the interior of a home in which wealth and happiness abounded. A number of rosy-cheeked children romping about the room were the shadows that I had imagined. Their merry voices came to me distinctly, like the babbling of a mountain brook—strange that I had not noticed them before. The door opened. "Daddy! Daddy!" shrieked the youngsters in chorus. I could hardly believe my eyes. It was none other than "Bull" Kilpatrick, and following close on his heels was "Chute" Gilchrist, who had evidently just arrived, for he had baggage in his hand. A handsome woman of most genial appearance entered the room. "Wife," said Bull, this is Chute, my old roommate of the college days, but now the well known Chief of the Bureau of Animal Industry, at Washington."

It was at this point that I attempted to interrupt. I called out first to Bull and then to Chute. Neither heeded my call, and after several vain attempts I was satisfied that my voice would not carry to that other realm into which I was being permitted to gaze. Finally I contented myself with looking and listening.

After the conventionalities of the meeting had been passed and Bull and Chute had at last settled before the big fire, each smoking a long stemmed pipe, I heard Chute say: "Bull, I have heard many stories of your success as the organizer of the Appalachian Fruit Growers Association, but I would like to know just how you got the thing started. It had occurred to me long ago

that such an organization was greatly needed here in the East, but I supposed that it would never be possible to get them to pull together."

"Well," he answered, "I don't believe it could have been done twenty years ago when we first launched our little ships on the sea of life, but the people have changed, education has had its effect, and the growers no longer hold back because of ignorance and prejudice. And this state, I might say, is largely due to the continuous and untiring efforts of Big Proffit for agricultural education and cooperation."

I was becoming immensely interested, but while I looked the figures became dimmer and dimmer, until they were only shadows again. The voices seemed far away, and finally came back only as echoes, and were gone. Thus with a sinking heart I saw Bull and Chute fade from view. They looked so comfortable there before the fire, I had a mad desire to join them, take down another pipe from the rack and "fire up." But I had only a few seconds to spend in regrets, for even while I was still gazing into the mist where they had vanished, the shadows became plainer and plainer, and at last quickened into life again.

The scenes had shifted, and a vastly different picture met my eyes. It was a busy corner in a large city and around three men clad in the uniform of the Salvation Army was gathered a large crowd. I heard one of the soldiers speaking: "Before we continue with the services, Lieutenant Lindley will render us a song accompanied by Captain Roberts on the banjo." Yes, it was certainly so; there was "Chauncey" and "Blondy," and the man speaking was "Preacher" Cloyd. I overheard two men near the outer circle of the crowd talking: "You don't mean to tell me. Are those really that famous Salvation Army trio?"

As this view faded from sight, there were many questions bothering my mind, but changes followed in such rapid succession that I had no time to ponder them. The next picture before my wondering gaze was a banquet hall; and standing at the head of a long festive-board I saw a familiar figure who I at once perceived to be Joe Spears, a glass held high in his right hand. "Gentlemen," he said, "as President of the Atlantic-Pacific Highway Commission I propose a toast to the guest of honor, the Chief Engineer of this great and newly accomplished project, which has so completely united the East with the West. Let us all rise and drink to the health of the Right Honorable J. R. Williams."

Next I was ushered into the sanctum sanctorum of the *Southern Horticultural Gazette*. In the chair of editor, I saw "Buck" White engaged in a deep and animated conversation with "Little" Proffit. The discussion had to do with the consolidation of the *Breeders' and Feeders' Weekly*, of which "Prof" was editor, with the *Southern Horticultural Gazette*. The consolidated publication, it appeared, was to be known as the *North American Farmers' Journal*.

From the heart of New York City to the midst of a wild and unfrequented tropical forest was a change so complete and sudden that for a second I was startled. The place apparently was a temporary sawmill camp, which consisted of a mill and many small shacks. I noticed a more important looking structure situated a little off by itself, over the door of which was roughly painted: "Cotton & Osborne, Lumber Importers—Venezuela Branch." While I was studying the peculiarities of my surroundings a door was thrust open and out came "Ed" and "Red." From what was said I gathered that they were on a tour of investigation to inspect the conditions of this camp, and expected to continue on to the next camp in the morning, and then back to headquarters in Norfolk, Virginia.

After the many surprising disclosures which Fate had thus far made to me I was well fortified to meet any shock that the Fountain of Destiny might now offer. It was therefore with little surprise but with profound interest that my eyes sought the following revelations.

A brilliantly lighted dining-room with many well-dressed men and beautiful women, seated around the tables, laughing or lightly singing to a musical accompaniment; this was the vista of delight which next was exposed to my view. I observed that every one had somewhat of a foreign air and spoke in a language which was unknown to me. While I was yet trying to locate myself and determine what portion of the world I was in, I saw a tall man enter, following the head-waiter, who was beckoning and bowing him to a table near the corner of the room. A man arose from a seat near by and approached the newcomer, slapping him on the back and exclaiming: "Hello, 'Sleepy,' old boy. Where did you drop from, and what brings you to Rome?" The man thus familiarly addressed as "Sleepy" slowly turned his head. "Why, I'll declare, 'Gossip.' And what are *you* doing here?"

I was glad when I heard Smith say: "Come over and join me at my table. I am all alone," for I knew that I was sure to hear lots of news. "What are you doing with yourself?" inquired Sleepy.

"Well," replied Smith, "for the past ten years I have been working hard, raising cattle on the western plains of our country. I made a little money, sold out, and am now seeing the world for a change. But how about yourself?"

"It was a little different with me," said Sleepy. "When I left college I went back to the farm, but soon tired of that life and went on the road selling toilet waters and perfumes. I made good at that and am now taking a two months' vacation in Europe. Say, do you ever run across any of the old fellows we were in college with?"

"I should say," he responded, "just the other day when I was in Madrid, Spain, I saw one of our classmates. Ward was his name, 'Rooky' Ward; of course you remember him. He is the chief construction engineer of the Spanish Central Railroad Company and was sent over by the American capitalists who are promoting the road. And it was only about a week ago that I ran across two more of the boys up in Germany. 'Rusty' Feild and 'H' Spencer are both at the University of Munich, carrying on some research work. You knew they became very famous as zoologists back home and came over here to continue their work. Then, I guess you have heard of Polk Denmark and Frank Procter. You came across, no doubt, on the Electric Ship Line. Well, it was Polk and Frank who perfected and made possible the complete control, in both guidance and motive power, of oceanic ships by means of electricity. They are considered the greatest engineers of the day."

"You don't say," said Sleepy. "That's the first thing I have heard about those fellows in a great many years, but I have seen some of the boys myself lately. I was in Edinburgh a short while ago, and who do you reckon I saw? 'Ikey' Setzer! Only got a chance to talk with him a few minutes. He told me that he had given up his engineering career soon after he finished A & M, and had taken up medicine. He is now a practicing physician of that city. Funny how the fellows separate, isn't it? While in London I had occasion to visit a photographer. After inquiry I was directed to the 'Witherspoon Photographic Studio' as the best place in town. When I walked in you can imagine my surprise when 'Skinny' Witherspoon came forward to welcome me; never dreamed that he was in that part of the world. Then again, on my way here I stopped over in Hamburg to see the start of an aeroplane flight across the Atlantic Ocean. I soon learned that the aviator was to be Wysong, an American. I at once looked him up and found him to be 'Herr' Wysong of dear old A & M. We had a long chat before he started. I saw his

machine, which he had built himself and propelled by that perpetual motion engine invented by J. C. Carpenter; it is the wonder of the age. I was glad to see from the papers yesterday that he arrived all safe and sound somewhere on the Jersey Heights just two and one-half days after starting."

"Didn't I tell you," interrupted Smith, "I had a letter from 'Shelby' Gardner this morning. Shelby, by the way, has just accomplished a great success in company with D. G. McArn by building an electric car system to the top of Mount Mitchell. But what I was going to say is that he told me John Pinner is here in the city, connected with the Royal University of Rome. What do you say to looking him up?"

"Good, glad to hear it. Let's do so at once," said Sleepy.

As they arose from the table the bright lights suddenly became dim—and I was again gazing at the rolling billows of white mist.

Office of the New York Secret Service Department. "Telegram for Chief Howard," said a messenger.

"Here you are," spoke a gruff voice, "right here." I looked to see the speaker and beheld "Doc" Howard. Would you believe it? He hastily tore open the telegram and eagerly read its contents. He reached for a button, and a man in uniform appeared. "Summon detectives Jeffers and Crowder at once—very important." Almost immediately "Major" Jeffers and Raymond Crowder entered. "Have just had word that the ten-year-old daughter of F. K. Kramer—that's 'Kipp'—has been kidnapped from his country home, supposedly by the black-hand bunch. Bull Martin telegraphed the facts. I want you two fellows to get to work on the case at once. Best go down to their Wall Street office and talk details over with Bull before going out."

The next scene disclosed the private office of the president of a large plumbing establishment. Sitting behind a highly polished desk I noted my old friend "Cholly" Weaver. I had heard that he had succeeded in collecting a bad debt contracted while at A & M and had used the money to set himself up in business. He was engaged in conversation with a stocky little fellow who was sitting back with legs crossed, complacently smoking a cigar. "Say, 'P. G.,' I heard Charlie say, "would you like to take in the baseball game this afternoon?" This sounded familiar to me so I took a second look and found my first suspicion to be correct. True enough, it was A. G. Phelps. "Sure I would; let's close up the joint and let the whole bunch go out. I *must* see 'Home Run Correll' in action once more before the end of the season. I think he is the best manager the White Sox have ever had," replied P. G.

I was evidently in a far distant land, on an island inhabited only by wild animals and Ethiopian savages. What could be the cause of the excitement, I wondered; for I saw a band of warriors rapidly approaching down the main thoroughfare of a village consisting of two dozen or more of the latest-model straw bungalows, and many scantily clad women issuing forth from these to meet the homecomers. As the bedraggled warriors drew nearer I observed that they were bearing among them some burden. At first I thought it probably the trophies of the day's hunt, and from the exhibitions of delight on the part of the lady members, I credited the commotion to the prospects of a feast. But to my horror I saw that it was a man—a white man—and he was dressed like a minister. At last they placed their prize upon his feet and with consternation I made sure that it was "R. P.," yes Russell Peyton Harris. The last I saw of R. P. he was the center of an admiring group of dusky maidens.

The sky overhead was dark and threatening and the landscape so far as the eye could see was one seamless waste of snow and ice. But even in this cold and desolate part of the world man had pushed forward. The sign read: "Yukon Engineering Company." "Harry" Henderlite stood on the porch of this crude building; he was clad in the rough fur garments characteristic of the Arctic region. A dog team had just pulled up, and the two men in charge proved to be "Red" Alexander and "A. C." Fluck. Only a moment passed before I had learned that Harry and "Charley" Eldridge were the engineers building the new government railroad which was penetrating far into the upper Yukon Valley. Red and A. C. then explained how well the wireless station at Eldoro, five days to the northward, was working, having received messages from the Hawaiian Islands.

"Rat-atat-tat-atat-tat-tow! boom!" burst upon my ears and set me swaying. Looking out over the vast throng that packed the immense theater, I could see thousands of others following the beat of the irresistible strain. On the great stage was seated a magnificent body of musicians, dazzling in their regalia of purple and gold. A placard at one side read: "Carolina Wiggles by Pearsall, Featured by Signor I. T. Lewis on the Cornet." As the music stopped, thunderous applause instantly rent the air. The director turned and bowed and bowed, smiling as he did so until nothing about him was visible but the smile. In spite of this almost perfect disguise I knew him. "Thunderations!" I muttered. "'Vick' for sure."

Again the scene changed. Two men were sitting in the lobby of a large hotel. I carefully scrutinized their countenances, but could recognize neither and was about to give up when I caught a bit of what they were saying. "Now, Elsie," I heard one of them say, "The only thing for us to do is to consolidate, just as old 'Deely' Hooper and 'Cutey' Eldridge have done with their cast-iron manufacturing plants. What they have done we can do. It means money hand-over-hand if we can get together on this; and let me tell you, if we will only combine our mill interests, we can control the cotton mill industry of the whole South."

I was in suspense to know the names of these important personages who were thus scheming together, and was relieved when I heard the other say: "I see your point, Burr, but can it be done?" Like a flash it came to me. "Burr Head" Smith and "Elsie" Atkisson, of course.

Busy working on the anterior anatomy of a sickly looking horse stretched prostrate upon an immense porcelain operating table, were two men, one somewhat short, the other long. It was some minutes before I definitely came to the conclusion that they were "Bob" Newcomb and Guy Commander. They were both working in silence, but at last Guy spoke: "I hear 'Nish' Daily has resigned his position with the Mississippi Electric Railroad and has gone back to Elizabeth City. They say his wife wouldn't let him rest until she got him back to their little home town." "Wouldn't be surprised," said Bob. "When the big boss gets after you, it certainly does call for action; I understand his position exactly. But listen, some one told me the other day that Tate deserted the ranks of the 'Country Gentlemen' and has entered the Constabulary of the Philippines, where he has risen to the rank of Lieutenant-Colonel. And say, I got a letter from Jack Ray this morning. It had been addressed to our old joint in New York and forwarded to us here in Baltimore. Jack says that the pearly skies and breezy pergolas of sunny southern Italy could not hold a candle to his modern Garden of Eden in the sand-hill district of the Old North State. He wants us to come down and spend our vacation with him and promises that there shall be no forbidden fruit, but also adds that there are no modern Eves to tempt us." There

was a quick knock followed immediately by the opening of the door, in which stood "Sunshine" Herman. I knew him at once, absolutely the same as back in those old college days—that same old broad and irresistible smile as apparent as ever. Both "Bob" and Guy stepped forward to give him the glad hand. "Was passing by and happened to see your names on the door. Thought I would drop in and see the Doctors," said Sunshine. "Am on my way home from Philadelphia, where I attended the meeting of the stockholders of the North American Land Company. I have been made the head of the Agronomy Department and we have sent 'H' Hopkins down into Alabama as a drainage expert to investigate a big deal we are about to pull off down there."

The next view was quiet and restful, a long, green meadow upon which a herd of cattle were lazily grazing, stretched out before a comfortable little cottage situated on the brow of a hill and surrounded by a group of pine trees. Sitting on the porch of this cottage was a man with a woman and several children, all of whom were gathered closely around the man, listening to a story he was reading them. I looked closer—Could it be "Trevath?"—J. E. Trevathan with a wife and five children. I looked at his face; it was serene and happy. Truly Fate had blessed this man.

I immediately recognized the interior of our National Capitol; I was in the Senate Chamber. A slim man with long, flowing hair was on his feet, wildly gesticulating and speaking in an agitated voice. "Now, gentlemen," I heard him say, "in closing I will simply state that I advocate the segregation of the races, not alone because I come from a state in dire need of such a law, but because I firmly believe that the future welfare and prosperity of our beloved nation depend upon such governmental control." This gentleman sat down amid thunder-like applause and cheers for Senator Teachey. I saw a man upon the far side rise and heard the Speaker acknowledge him as Senator Leguence of Louisiana.

I was disappointed that Fate did not allow me to pause here and listen to what "Leg" had to say either pro or con in reply to "Teach"; but another picture, equally as absorbing, appeared through the filmy mist. Two men were busy at one end of a long laboratory table, upon which were many rows of bottles and much delicate apparatus; a slight greenish-yellow vapor was rising from the liquid with which they were working. When I heard them speak I knew that they were "Bunny" Constable and "Herr" Wiggins.

"Bunny," said Herr, "I guess we had better go ahead and order that twenty-horsepower hot-air engine from the Carolina Iron Works; they seem to put out the best on the market. I would never have thought Blount and 'Shorty' Gray had it in them to build up such a business. You remember when I was down in that country last winter I went all over their plant at the same time I went through the Pegram & Haddock Cotton Mill."

"I have heard," replied Bunny, "that they have sold that mill for almost a million dollars and have retired from business. It is also said that Pegram married a lady who was an excellent cook. The queer thing is that in spite of his wealth he still makes his wife do the cooking. She made the mistake of cooking such good waffles and rolls that Pegram won't let her hire a cook. I got this information from 'Monk' Carter, who passed through the city a few days ago. From what he told me I judge that he and 'Scoup Dog' Rosser are also making good. I learned that they had gone in for mining engineering and had lately been awarded a contract to open up and develop a big vein of coal in Western Carolina. They expect to get a big rakeoff, he said.

High into the ethereal blue towered two majestic peaks, their snow-crowned summits losing themselves among the fleecy clouds that hovered near. From the sculptured canyon dividing them there gushed with a deafening roar a great, foaming torrent of white. Standing on a huge spray-washed boulder at the edge of the angry waters were two men. In an effort to make himself heard, the tall one was yelling lustily to his companion. Straining my ears, I caught the words: "'Wuggie,' old horse, it can be done all right, I tell you; and 5,000,000 horsepower if there is one!" The other turned and yelled back: "And money enough to sink a ship. Let's quit when we've finished this job." Well, you can't always tell from early indications what potential energy may be stored up in a man, that's certain. These picturesque figures were, no doubt, engineers *par excellence*, but most remarkable was their identity. Henry Harshaw and H. M. Watson! Yes! It was here that I began to entertain doubts as to the integrity of the being who called himself Fate.

But my ponderings were interrupted. Suddenly I found myself in a small den-like room, the type commonly spoken of as a *bachelor's boudoir*. "Goat" Hall had just rushed in with a letter in his hand. He looked very much like the Goat of old, still small and clean-shaven; but I saw (was it pure imagination?) a new twinkle in his eyes. I could not at first identify the person whom he addressed, but in a moment I was somewhat horrified at the discovery that the individual was none other than myself. It seems I had become a little more filled out—no, I reckon I must confess, I had gotten fat! Yes, fat I tell you—*decidedly corpulent*.

"Listen," said Goat very excitedly. "You know, 'Bull,' this life in the Argentine has been *almost* complete. We are what our friends back in Carolina would call rich. But listen! I am going to make it complete!" He fairly shouted the words and began to jump about the room in a most idiotic manner. I arose and grabbed him by the shoulder. "Cut it," I said, "what's the scheme?" "The scheme," he answered, giggling like a high-school girl. "The scheme is that I leave you in the morning. I am going way up South to get the sweetest girl that God ever had the pleasure of creating. Sabe?" "Goat," I shrieked—but got no further. I had turned a peculiar greenish white color and began to totter. Goat's face clouded and he clutched my arm as I slowly sank to the floor. Panic-stricken, my old friend grabbed a bottle of wine that was standing near by and was vainly attempting to re-color my pallid cheeks with the red liquid when something got wrong with the picture machine—no, I mean a cloud must have drifted beneath the sun. Any way everything got mixed up in the Fountain and just then what seemed the sound of distant thunder reached my ears. The rumbling increased and in a moment burst with startling madness into a terrific roar. The ground began to tremble and sway, and a powerful unseen force gripped me and tossed me about, then sent me hurling through an atmosphere of darkness. The terror of the inevitable death clutched my very soul. On and on I went—miles, thousands of miles, with the speed of a runaway express. Through space, endless space, I flew, gaining momentum rapidly until I could barely gasp for breath. It would soon be over! Then from somewhere came a faint sound—yes, an earthly sound it must have been. Again distinctly: "Say, Bull?"

"WHAT!" I yelled, jumping to my feet. There before me stood Goat with an extra broad John Bunny grin adorning his face.

"Trying to kill a little sleep, eh?" Then very gently, "Don't look that way, I won't hurt you this time. Let's beat it over and hear Sherwin splutter awhile. It's twelve-twenty now."

"Hell!" I meekly replied. Then added doubtfully, "Guess I'm with you."

1915
COVNTRY
GENTLEMEN

Statistics

Ye grouch, ye grind, ye others too,
And ye who receive no mention,
Approach and read what is for you,
And ask not any question.

Whom in 1915 do you consider—

The handsomest?

For beauty in its most umptuous state, 1915 has Apollo lashed to the mast. J. B(eautiful) Bruner is the one original handsome fellah.

The most versatile?

"Colonel" Kramer is thought by the class to be our many-sided man, although many were booked in this race.

The best athlete?

This race was not won in a walk. W. O. Potter led the field, but "Nish" Daily came in under the wire long before the dust had settled.

The best dispositioned?

If a good disposition means a harp in Heaven, 1915 will have several musicians in the first orchestra, "Red" Alexander leading, accompanied by "Sunshine" Herman.

The most ladylike?

Ah! soft music from the orchestra. The gentlemen will please remove their hats, while we introduce "Miss" F. C. Wiggins as leading lady and "Bunny" Constable as understudy in the comedy, "Mother's Boy."

The best dressed?

Here Henry Harshaw receives the just deserts of his untiring efforts.

The greatest heart smasher?

Let us give the devil his due. Will some one kindly assist Cupid in gathering up the fragments while R. T. Newcomb proceeds to new fields of conquest?

The grouchiest?

It is to be regretted that pickles were included in Harry Henderlite's daily diet when a youth. Some think W. K. Eldridge is also a candidate for the United Killjoys' Union.

The most useful?

For its purpose the Class of 1915 finds it necessary to rearrange the renowned phrase to read, "Let Kid Rosser do it."

The biggest grind?

We have not been forced to save up coupons to get one of those. R. P. Harris is the model from which others are copied.

The greatest smoker?

Although Professor McNutt had no vote in this, it was decided that "Blondie" Lindley was the living smokestack.

The greatest eater?

Unanimously, "Pegram." He holds the record of eating twelve eggs and accompaniment, at one sitting.

The laziest?

H. Hopkins has it, but in this race for the non-energetics F. T. Gray had plenty of supporters.

The greatest hot air artist?

The best known exponent of Mexican athletics to be found north of the international border line is W. F. Kilpatrick, better known as "Bull."

The worst athlete?

For leading negative athlete there was competition a-plenty; but we must abide by the score card and give this booby prize to C. P. Eldridge.

The most notorious?

In such an illustrious class, who less than our brilliant locked Drum Major could win? So in this hall of fame we must place first the bust of "Red" Osborne.

Who in 1915 has—

The most class spirit?

It is believed that J. R. Leguenec has drunk the deepest of this highly recommended beverage. D. T. Daily is also surcharged with the same intoxicant.

The most soulful eyes?

Who of you, having ever gazed into the unfathomed depths of a pair of liquid orbs, will contradict that B. White wins in this contest of sparkling glimmers?

The best moustache?

Several high powered microscopes were used by the voters in this research work. They finally decided that R. H. Feild possessed the most promising growth on the upper lip.

The best chest?

It was not deemed necessary to vote on this, for J. McK. Spears has to open the windows to throw out his chest; and if this distinction had not been given him somebody would have had to fight.

What senior is most likely to succeed in life?

Those not voting for themselves, seem to be of the opinion that "Dock" Howard has the primrose path to prosperity directly before him.

What was your object in coming to A & M?

"Just for the hell of it. P. S.—I got it," states a truthful one.

Why have you stayed so long?

It was realized that after four short years it would be literally "so long."

What is the average number of ones you receive per report?

It does not seem that there has been such a oneness to any of them as to cause monotony.

How much do you spend here?

A few hours out of every twenty-four are spent at A & M, the rest of the time and all of the "filthy lucre" are invested in Raleigh.

What is your average time of retiring?

With our sports it is every time they get a blowout, which some claim is about every fifteen minutes.

What is your favorite tobacco?

"In the tidy red tin, in the toppy red bag," you will find our old favorite, Prince Albert.

What is your favorite amusement?

Quityerkiddinkid! This is an A & M idiom.

Why do you wear clothes?

With one it is because fig leaves have gone out of style, but another thinks they make him look cute.

What is your greatest ambition?

Some wish to blow rings of cigarette smoke at the ceiling and know that all of the faculty are watching them.

Which is your favorite girls' school?

Naturally—"The nearest one"; which being interpreted means St. Mary's.

Are you partial to any one girl?

Yes, any one. Another thinks, "The girl upon the dollar is the sweetheart of us all."

Would you marry for money?

We are reminded that parsons do, so why not an A & M student?

Who is the handsomest professor?

Naturally competition enters here. But for unadulterated, unmitigated, and undisputed handsomeness turn your opera glasses on Professor W(inning) C(ountenance) Riddick.

Who is the hardest professor to bluff?

Professor J. C. McNutt, being by training a judge of livestock, has little difficulty in detecting any attempt by the genius "homo" to put one over on him.

Passed by the National Board of Nonsensors

1720-1820.

Junior Class Poem

Oh, where are the days that are past and gone,
And whither the hours flown?
For it seems so short since the setting sun,
On our first eve at college, shone.

Can it possibly be that three whole years
Have silently slipped away?
Or is it a dream, a deceiving dream,
That passes within a day?

No, never a dream, and yet how gay,
How joyful does it seem,
As I think of the many happy hours,
When out of the past they gleam.

Another year will pass and then,
Sixteen will be no more;
We must leave forever old A and M,
Farewell to her books and her lore.

Then let us make sure, O classmate, dear,
Of the friendships' bonds we've formed;
Let's strengthen them day by day as we go
And let them by nothing be harmed.

History of the Junior Class

The rise and fall of the Roman Empire, the conquest of England by William the Conqueror, the discovery of America, and the downfall of Napoleon were all great events in the world's history; but all these fade into insignificance when compared with the great event which occurred on the seventh day of September, 1912. On this date two hundred and twenty-five men, after the trials and tribulations of the first matriculation, banded themselves together and were thenceforth collectively known as the Class of 1916.

A few days later a meeting of the class was called and the following officers were elected: C. J. Pruett, President; W. M. Osborne, Vice President; P. A. Roberts, Secretary; E. K. Herman, Treasurer; L. C. Holt, Historian; and J. C. Collier, Poet. These men filled their respective positions ably. At the end of our first year the following men were elected to serve during our second year: H. E. Winston, President; R. B. Wheatly, Vice President; T. L. Milwee, Secretary and Treasurer; K. Sloan, Historian; and L. B. Jenkins, Poet. We were guided through our Junior year by the following officers: W. C. Albright, President; C. S. Abernethy, Vice President; T. L. Milwee, Secretary and Treasurer; L. B. Jenkins, Historian; and K. Sloan, Poet.

In athletics we have done quite well, always putting up a hard fight, and winning in 1914 the championship in baseball and tying for the football championship. We have furnished the 'Varsity with several men in each department. To football we gave McHenry, Cook, Seifert, Riddick, Winston, and Bonner; to basketball, Mason and Lindsay; to baseball, Winston and Brittain; to track, Milwee, Abernethy, Johnson, and Goodson.

Now as we are nearing the end of our third year, we look back over the ground we have covered, smiling over the many little incidents which have made our college life, and thinking, perhaps with regret, of the numerous opportunities wasted. As a class we have made good in our studies, in athletics, and the various other college activities.

Sophomore Class Poem

When Freshman days were fading in the West
Our hearts were full of life's great crimson stream,
And as the stars shone through the cloudless skies
To light the few short hours that we should dream,
There came a change, as all things human change;
And what that change has meant no one can tell
But he who's lived with us through Freshman days
And done his duty as a man and well.
Then let us speak the secret joys to them
Who may not know the sweets of Sophomores,
The mighty Seventeens of A and M.

And every day has brought to us its tasks
And each has brought some pleasure with it too;
We've been victorious in collegiate games
As well as other things we've tried to do.
We've loved our younger classmen as we should
And we've been nice to Freshmen as can be,
But oft we've taught them moral lessons by
The way the men threw Jonah in the sea.
Oft we've assembled by the evening stars
With peals of laughter on the village green
And yells for Sophomores—the Seventeens.

Sometimes when other fellows were in bed
With violin and bow we risk a chance
To have our name upon the conduct roll—
We stroll out in the park to have a dance.
And hunting too, out on the hills we took
The 'possum from the tree against his will,
And while the moon was hid behind a cloud,
We took the sweet potato from the hill.
With tales of every sort we end the night
And wander back to college as the stars
Are fading from the morning span of light.

When all our days within these walls are o'er
And all our present hopes and fears are past—
When Seventeen is locked in realms of time,
Our bonds of friendship shall forever last.
Two years we've known each other in our class,
So now we'll change our shrine for something new
To leave a place for worthy younger men,
And carry higher yet the White and Blue.
With hand and heart we'll say farewell to thee
And give three cheers to our most noble class,
The loyal Seventeens of A M C.

History of the Sophomore Class

The Sophomore Class dates its history at A & M from the third of September, 1912. We entered with the record-breaking number of two hundred and forty-six members. We rallied around our class banner of blue and white and suffered few defeats. At first our maneuvers were like those of all Freshmen. We lived in constant dread of the Sophomores, but were treated kindly and soon became tame. Many athletes were chosen from our class, an honor of which we were very proud. At the close of that first year we left college for our homes, wiser but not sadder men.

Last September, to our disappointment, only one hundred and twenty-one members of our class responded to the roll call. During the summer vacation a considerable number had emigrated to the western states, and for reasons best known to themselves many failed to return.

Our first duty, of course, was to select painters to decorate the lofty heights with our class numerals. The magic number "17" shone out from the walls of the buildings and the tops of tanks. Immediately upon our return, and before our climbing artists had fairly begun their labor, we put on our sophomoric dignity and began directing the footsteps of our little brothers, the Freshmen.

After the first few days of excitement were over we settled down to a long period of study, for the second year of college life is not devoted entirely to the initiation of Freshmen. And so we put forth a great effort to acquire some knowledge of the subjects so ably presented to us in the different departments. But we did not forget the other side of college life. In the first place we took an active part in all college athletics. In the annual cross-country run W. K. Scott won first prize and W. W. Olive third. The following men represented us on the football squad: J. W. Artz, M. C. Fowler, R. Gant, W. M. Johnson, J. E. McDougal, P. T. Simmons, F. T. Stowe, B. Temple, P. G. Tenney, C. E. Van Brocklin, and R. C. Young.

In class athletics we have as just a claim to the championship as has any one. The first game was played with the Juniors and ended in a 0–0 deadlock. The Freshmen were then played, and so well matched were the two teams that neither side was able to score. Another contest was staged with the Juniors, and this resulted in a 6–6 tie.

Besides going in for athletics, our class has taken active part in the literary societies and agricultural clubs, and some of our members have shown that they possess considerable talent for this kind of work.

To the college publications we have contributed some good material; for example, several poems by D. A. Monroe, and short stories by R. V. Grindstaff, E. P. Holmes, and J. E. McPhaul.

In all its activities during the year, the class of 1917 has shown a strong class spirit and an ambition collectively and individually to do its part for the betterment of the class as well as for the honor of the college.

HISTORIAN.

FRENCH

Freshman Class Poem

Here at college we are at last,
To work for the future and leave the past.
Hardly weaned from our mothers' care,
Yet here we are in the Freshman chair.

We are green, you can easily see,
Green like grass, as young as can be.
Our knowledge is small, our ambition is high;
If dreams were castles they'd reach the sky.

Our work for the Sophs is carrying water,
Which seems to them only what we ought to;
And if perchance we fail to do more
We wake next morning on the floor.

The faculty think we ought to do
Whatever they ask, with liberties few,
For we're allowed only a half day leisure
To rest from our work and seek some pleasure.

Our life is hard, but we're willing to wait
Till May exams. put the seal on our fate.
For if we pass, which we intend to do,
We'll muster next fall as Sophomores true.

So work, poor Freshman, with all your might,
If you intend to win in this fight.
Few words of courage for you there'll be
While you are Freshmen at A M C.

History of the Freshman Class

On September 3, 1914, there were resistered about two hundred and sixty new students who were to compose the Class of 1918. This is the largest number of new men ever registered at A & M College. In spite of our great number we were as green as any preceding class.

The first two weeks seemed like months to us, as we were almost afraid to go to sleep for fear of being interrupted in some unpleasant manner by the class just one year our senior. After a short while we knew each other better and began to feel at our ease, for each one of us was sure that the Soph was just after that other Freshman.

Since we have overcome our fright we have given more thought to our work than to hazing for the faculty impressed this fact upon our minds, that a great day was coming for all Freshmen just before the holidays.

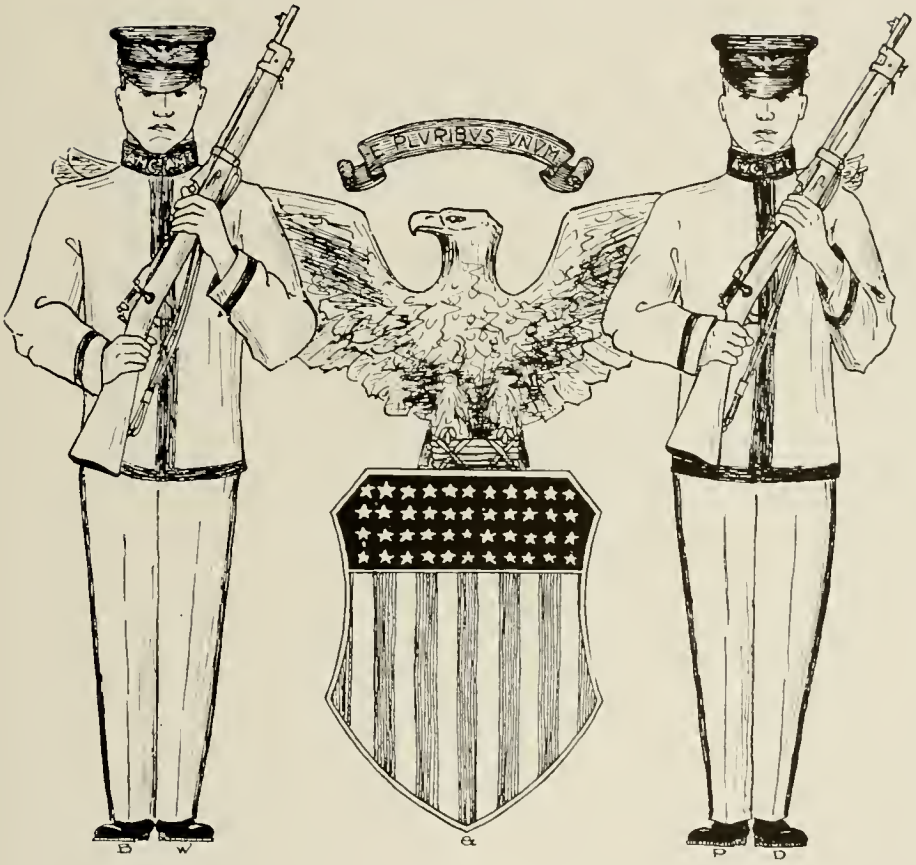

On September 10 we elected Mr. F. B. Whitaker to lead our class for the year. Mr. C. B. Skipper was elected Vice-President and Mr. E. F. Lewis, Secretary-Treasurer. At the next meeting we elected the following officers: Messrs. G. C. Cox, Honor Committee Representative; J. G. Hicks, Manager of the football team, and C. B. Park, Captain.

In athletics we have made a good showing. We furnished several stars for the 'Varsity and a number of good men on the scrubs. Our game with the Sophs was quite a surprise to every one. In fact, we really surprised ourselves. When the game ended the score was 0 to 0. Not since the present Seniors were Freshmen has a Freshman team done so well. We feel very proud of our team and feel sure that a number of them will make the 'Varsity next year. In regard to baseball, track, and basketball we feel sure we will rank among the winners of the series, which will be played between the classes next spring.

In conclusion we wish to thank all the upper classmen for their kindness toward us while Freshmen, and we all hope to be back next year so that we may have a good Sophomore Class.

The Regiment

At this time of so much agitation concerning the introduction of military drill into all college courses, as a physical exercise for the masses as opposed to the few which college athletics reach, A & M finds herself in pace with the movement. Here every man, physically able, is required to take three years of military drill; and should at any time war become inevitable, A & M could put into the field a strong and creditable body of trained men.

For the past two years the military department has been under the able and efficient supervision of Lieutenant H. F. Spurgin, C. A. C., whose untiring efforts have been a source of gratification to all who have the interest of the institution at heart.

Owing to the growth of the College, this year it was deemed expedient to supersede last year's battalion with a regiment, consisting of two battalions of four companies each. F. K. Kramer was appointed our first Lieutenant Colonel.

To incite interest in this phase of college activities, there was held, during the first part of February, a competitive drill between First and Second Battalions, the latter, under the command of Major G. L. Jeffers, carrying off the honors. Next, the First Battalion had a competitive drill, resulting in a victory for Company B, commanded by Captain F. C. Wiggins. This company then drilled against each company in the Second Battalion, with the result that Company E, under Captain V. R. Herman, won the colors for being the best drilled company in the regiment.

During the first month of school the new men demanded most attention, and drill was held five times a week. At the end of this period they manifested a sufficient preliminary knowledge of tactics, and drill periods were reduced to three times a week. After Christmas both close and extended order drills were held, practice being given in forming advance guards, establishing outposts, and marches. This, supplemented with company, battalion, and regiment drill, continued until the annual inspection in April, after which all drill was suspended.

A Record of Athletics

During the Year 1914

A & M was established twenty-five years ago, and since that time has risen from the "joke" to one of the leaders in athletics of the South. During the year 1914 we have gone forward; not with such leaps and bounds as in some previous years, but with a good, steady stride toward the supremacy of the South.

In 1914 basketball was for the first time seriously considered as a sport at A & M. Under the leadership of Phillips, who was injured early in the season, and Sumner who acted as Captain, the team defeated all North Carolina teams played, except Wake Forest. We do not consider this a bad record for a beginning.

The baseball season opened without a single man of the previous year's infield at college, but work began with an excellent pitching staff and two good outfielders. Captain Farmer was shifted from the outfield to first base, and with him as a nucleus an infield was built up. When the season ended the A & M team was champion of North Carolina, and considered by many to be the best team in the South Atlantic division.

The track team was very successful with such men as Sumner, McDougall, Potter, and Hurtt as principal point gainers. It was probably the best track team we have ever produced at this institution, all comers being defeated.

Football is a game that calls for self-control, mental agility, courage, speed, and muscle. These are the requisites of a successful man in life, and are the qualities that A & M tries to develop. For these reasons more interest is taken in football than in any other form of athletics at A & M. For years this college has been noted for its excellent football team. The team of 1914 was very good. It won no championship, but always played a good game. The most representative game played was against the United States Naval Academy, who defeated us 14 to 12. We also lost to Virginia Polytechnic Institute, 3 to 0, and to Washington and Lee, 7 to 0; but every game was a fight to the end, and A & M was never defeated until the whistle blew. It is impossible to name the stars, for every man acquitted himself with glory. But one figure stands out far above the rest. Every one recognizes that the little red headed quarter back, Van Brocklin, is the best field general and all around football player who ever wore

the Red and White. To him belongs, largely, the honor and the glory of the 1914 football team.

A & M teams win games and rejoice; A & M teams lose games knowing that they are outclassed in skill and muscle, but never in effort. It can always be said, "They fought a good fight." Let it ever be so!

The Royal Conclave of the Sons of Eli

Preachers' Sons Club

In November, 1914, a number of young men here met and organized "The Royal Conclave of the Sons of Eli." The purpose was to get every minister's son in college in the organization, so as to know each other better and to promote the welfare of all both spiritually and socially.

Twenty-fifth Anniversary

This session marks the twenty-fifth mile stone in the progress of the North Carolina College of Agriculture and Mechanic Arts. It was especially fitting that October the first, second, and third were set apart for the Twenty-fifth Anniversary Celebration. It was indeed a rare pleasure to the students and faculty to serve as hosts upon this occasion; however it must have been with far greater delight that the alumni returned to renew old acquaintances and fond remembrances of their undergraduate days, and to view the phenomenal growth and extension of their beloved Alma Mater.

Quite extended preparations were made for the entertainment of our guests, which were as follows:

THURSDAY, OCTOBER 1

8:00 p. m. Literary Societies Meeting.
9:30 p. m. Smoker.

FRIDAY, OCTOBER 2

9:00 a. m. Class Reunions.
10:30 a. m. Technical Meetings.
12:00 m. Alumni Association Meeting.
1:30 p. m. Alumni Dinner.
4:00 p. m. Military Drill.
5:00 p. m. Reeeption to Ladies.
8:00 p. m. Addresses by Former College Officials.
9:30 p. m. Reception.

SATURDAY, OCTOBER 3

10:30 a. m. Anniversary exercises.
3:00 p. m. Reunion of Monogram Athletes.
4:00 p. m. Football Game with Wake Forest.
9:00 p. m. Pan Hellenic Dance.

To A & M

Give yourselves over to laughter,
Close up your books and quit;
Here's to A & M, now and hereafter,
Yell, fellows, tune up a bit.

Rise, every A & M fellow,
Set up some glorious song,
Hollow loud notes and mellow;
Show that you are glad you belong.

Alumni from ocean to ocean;
Old men and young, all are here
In handing to A & M your devotion
Rip off the roof—don't you eare.

E. P. HOLMES, '17.

The Celebration

Anniversary bells are ringing
In the halls of A & M
And the classes now are forming
And the men are joining them;
Youthful boys and gray-haired students—
Now the old is with the new—
And the class of seventeen is
With the class of ninety-two.

From the banks of the Hiwassee
And the Albemarle Sound—
From all states and remote regions
Are the men a-gathering round
To be present at the meeting
And review their old, old way
And join their friends and comrades
On the celebration day.

Welcome! Welcome! are the greetings
From the new unto the old
By the junior and the senior
While the younger men are bold
And extend a hand of friendship
To the men they're glad to own
As their worthy predecessors
And as friends they've never known.

Many words of friendly greetings
Fill the air in Pullen Hall
While the happy boys are marching
Into line at bugle's call
To be ready for the drill grounds
All in mirthful jollity
We give parades in honor of
Our dear and great Alumni.

We thank you, dear Alumni,
For you presence with us here
And we hope again to greet you
In these halls some future year.
When we've grown more old and serious
(As we will by nature's way)
We hope to greet you with such greetings
As you've shown to us today.

Now we love our Alma Mater
Better than we did before
For we know the men who built her
And the honest boys that bore
To our hands a golden treasure
Oh! May we ne'er blot or maim
That great, pure and priceless treasure
She possesses in her name.

Hashimura Togo on Senior Week

To Editor "Agromeck Review," who once a yearly like ground hog come out.

Dear Sir:—It are with joyfulness that I take pen in hand to scrib to you how I delight at Senior Weak.

I come to be there soly: a comrad of prepish school acquaintance who make invitation to me reprobate, "If Broadway are two snailish than you wish, arrive via railroad at home of Joe Uncle Daniel who discover temperate Navy, but not so Senior Weak." I retort via wire, "Will make gallup feet on train for elephantish size time." Thusly asserting my veracity, I drop in.

Event one of this eutup were basketball game which are scuffled by Commish Officers vs. Company "Q" (who are too lazylike to be former) at A & M Y. M. C. A. gym. This game make me surprise since I see no baskets, but with Jack Johnston attitude the ballers clad seashorely make pugnation for ball to throw at iron hoop on wall. After much pants & perspiration, watch-keeper corrode knowingly, "Time are finished." In daized way I ask to know, "Who win it?" "Company 'Q.'" storm at me harshly.

At 30 min of ten on night following I are assembled with huge gathering wearing Pegram-like expression at Yarboro Inn where apatite are to be lowered and spirits raised. Hon. Toastmaster snib, "Take seat," and pep are started by Fruit Tree yell which cause more yellups. As Hon. African serve us with Delmonico fashion everyone imbibe freely class spirit and get desirous to making oratory. With dumbfoundness I are infatuated with flow of rhetoric all way from "Mexican Athletix" to "Give A & M Less African Name." After assimulating this hard knowledge for some period, interest are detracted to bedward and hysterical party disperse itself.

For to recuperate and other repairs the day next is assigned for restup. "Togo," my friend nudge, "tomorrow night are scheduled for Vernon Castle exercise." I rejoice muchly and Friday evening we ascend up stag-like to dance hall. With Dr. Frederick bows I are presented glibly to biddies of Parisian plumage. To strains of harmoniousness I pranced with eutish & sweetful ladies, making glances with Elanor Glynn hero eyes to her, until one Hon. Miss see hunger expression and judiciate deliciously, "Midnight breakfast are waiting at home." Howeverly, it do not wait long.

I am high flattened at your whole affair. Hoping you are the same,

Yours truly

Hashimura Togo.

[*Apologies to Wallace Irwin.*]

SENIOR CORRESPONDENCE COURSE

As It Is

I.

A boy rushed into the office
Of the college Registrar,
With a melancholy look
And a letter from his Pa.
Mr. Owen gave him permission
From his work in the dairies
And the next scene finds him
In the parlors of St. Mary's.

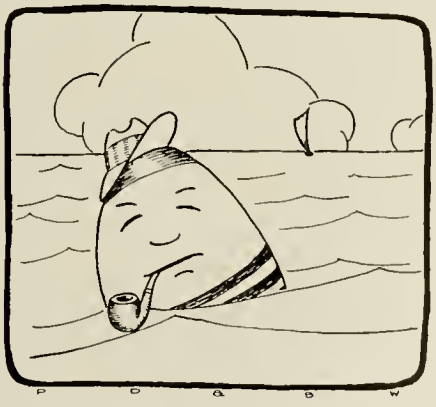

II.

The next fellow came in
With a rag around his head,
With an exclamation, I'm ill—
In fact I'm nearly dead.
Mr. Owen gave him permission,
And his story was also myth,
For the next scene finds him
In the parlors of Meredith.

III.

The third man came in
With an exclamation, "I've found
The evening train has brought
My mother into town."
Mr. Owen looked up in anguish—
Said, "Will this trouble never cease,"
And the next scene find this man
On the road that leads to Peace.

TENNIS TERM—LOVE GAME

Decalogue for Fussers

1. Thou shalt devote thyself to a study of the quirks and twists, the hesitates and slides of the newest of new dances.

2. Thou shalt adorn thyself with a suit of Jacob's best, with wide cuts and curves. Yea, and kid gloves shalt thou wear, and a hat of doggiest fashion.

3. Thy hair shall be parted on the very edge of thy cranium, well sleeked and with a touch of frou-frou.

4. Thy fingernails shall at all times be well trimmed, shined and glossed.

5. Sweet words and honeyed compliments shalt thou use, and abhor the crudeness of A & M slang.

6. One cup, three maccaroons and one cigarette shalt thou juggle with one hand and wave the other languidly as thou speakest.

7. Thou shalt be serious and impressive with young girls, saucy and impudent with old ladies, and just a bit snobbish with thy classmates.

8. Thou shalt be bold, but not too bold, keep a sensitive hand on the wheel, and never lose headway when she comes around into a new mood.

9. Beware the little broken laugh that spoils a kiss, keep a wary eye on the stage setting, and be sure thou lackest not ardor.

10. And, above all, as the Social Aides insist, be "precious."

WE MADE THE ENGRAVINGS FOR THIS BOOK.

The Young Man

The young man ariseth in the morning, and adorneth himself in golden raiment.

His socks are as white as the driven snow and as light as the wafted zephyrs of a summer eve.

His gloves are of yellow chamois, sewed with black silk. And he is some kid.

His hat is of fuzz, bedecked with a cute little bow which followeth on behind.

Upon his arm is worn very becomingly a cane of shellaced hickory.

And his suit is made in accord with the high cost of living—the material is used mincingly. It fitteth him quick.

He betaketh himself to the apothecary's, where he surpriseth a fair young damsel, dressed with the delicacy of a gazelle. She pretendeth to be in the act of making an order, but she will suffer herself to be blown to a nut sundae by the young man.

As they pass out, the young man giveth the soda jerker a wink, which he understandeth and is satisfied. For he knoweth that the young man is broke, and that he will receive his payment when father's monthly pension check arriveth.

Knight: Joe, I am coming over and sit on you tonight.

Spears: If you do, I will get up and leave. That will make the lady awful sore at me.

Young Lady: Does that fellow Daily go to A & M?

Bright One: No, he goes to Meredith.

The College Boy's Lament

Tell me not in joyful numbers,
College is a rosy dream;
For P. G. never sleeps nor slumbers,
Tho' he smiles at you serene.

In accents fierce he doth remind us,
We must meet inspection sure;
Else, the marks we leave behind us,
No eraser can obscure.

Dare we speak in childish prattle,
Just in fun, that's what I mean;
"Go thou like dumb driven cattle,
Get thee hence and see the dean."

F. E. W., '15.

Prof. Riddick: Now, gentlemen, I have told you this once before, but that is one good thing about this class. No matter how often I tell you a thing I can always tell it again after a week or so without any fear that any one will remember it.

Doctor Tommy: Well, I am not trying to make you think you do.

Skin: I thought Red Osborne's father was a veterinary doctor.

Rooky: Why, because Red is such a jack-ass?

Stude: Danny, why did you join the Y. M. C. A.?

Tate: To add more statistics after my name in the AGROMECK.

Prof. Camp: Mr. Osborne, what is one of the checks to the increase of population?

Red Osborne: Er—er the census, professor.

Polk: Shut up Charley. I can't hear myself think.

Eldridge: Excuse me. I have lost my eye teeth and can't see what I say.

WHEN DREAMS COME TRUE

Friend: Red, there are some pencil marks on your face that have been there a week.

Osborne: Don't rub them off. That is the date I washed my face last.

"Little Sunny Jim," inheriting the trait from his old man, tried to get away with this one: Professor, can you graft a pine on an apple and get a pineapple?

First stude (ont the cold, gray dawn of the morning after): I was held up last night.

Second stude: You were?

First stude: Yes, all the way home.

Dr. Robert Cornelius Wilder
of the Chemical Department

She: The man I marry must be a hero—brave, daring and gallant; he must have enough to support me comfortably; must have a country home, and, above all, be honest.

He: Thet's all very good; but this is love—not a department store.

Retrospect

Have you ever experienced that feeling of keen delight and joy of living—that rejuvenation which permeates one's being when after a hard, long, hot summer day's toil you plunge into the cool, sparkling depths of a silvery stream? It is with such a feeling, after a long and arduous task of assembling, compiling, arranging and rearranging, adding and subtracting, proofreading, smothering profanity, and informing multitudes of interested friends that this publication will be out in a few weeks, we now bestow upon you the fruits of our labor. While this volume does not embody the style of a Dickens, the polish of a Milton, or the creative genius of a Poe, it depicts the life at A & M as we have seen it, known it, and lived it.

However, the editors do not desire to assume all of the blame or credit which may be attached to the publication of this book; so, if for no other reason than that they shoulder their part, we wish to acknowledge our accomplices. An examination of the book speaks its own praises to our printers, Edwards & Broughton Printing Company, of Raleigh, N. C. They have done their work excellently, and have enabled us to accomplish the unheard of stunt of getting the AGROMECK out on time. For the cuts we are indebted to the Electric City Engraving Company of Buffalo, N. Y. Tyree of Raleigh, N. C., deserves special credit for the high class photographic work found throughout these pages. We also wish to thank Dr. D. H. Hill and Prof. H. R. Fulton for their willing assistance. Give these parties as much of the blame as possible, and we will take the rest.

Now, we, of the Senior Class, after four years of close association and profitable preparation, through the grace of the faculty, are ready to go forth from the doors of our Alma Mater to take our places on the firing line. Let us do so with this thought in mind:

Some ships sail east, and others west,
While the selfsame breezes blow;
'Tis the set of sail, and not the gale
That bids them where to go.
As the winds of the sea are the ways of men
As we slowly pass through life,
'Tis the set of the soul decides the goal,
And not the storms or strife.
